List of Figures

2.1 Few configurations or basis states for \( m \) spinless bosons in \( N \) sp states 19
2.2 Ensemble averaged state density for BEGOE(\( k \)) .................. 20
2.3 Interpolating parameter \( \mu \) plotted against the body rank \( k \) for BEGOE(\( k \)) 21
2.4 Nearest Neighbor Spacing Distribution for BEGOE(\( k \)) ............. 22

3.1 Block form of BEGOE(1+2)-\( F \) ensemble ............................. 45
3.2 Eigenvalue density for BEGOE(2)-\( F \) ................................. 46
3.3 Average-Fluctuation separation for BEGOE(2)-\( F \) ....................... 47
3.4 Nearest Neighbor Spacing Distribution for a BEGOE(1+2)-\( F \) ensemble 48
3.5 A plot of Brody parameter \( \omega \) as a function of \( \lambda \) for BEGOE(1+2)-\( F \) ensemble ................................................. 49
3.6 \( \Delta_3 \) statistics for BEGOE(1+2)-\( F \) ensemble ........................ 50
3.7 Plot showing \( 1/f \) noise behavior for BEGOE(1+2)-\( F \) ................. 51

4.1 Block matrix form for BEGOE(1 + 2)-S1 ensemble ..................... 72
4.2 Ensemble averaged eigenvalue density for BEGOE(1 + 2)-S1 ensemble 73
4.3 Nearest Neighbor Spacing Distribution for BEGOE(1 + 2)-S1 ensemble 74
4.4 Transition of NNSD with respect to \( \lambda \) for BEGOE(1 + 2)-S1 ensemble 75
4.5 Ensemble averaged variances for BEGOE(2)-S1 ensemble ............... 76
4.6 Normalized self-correlations in energy centroids for BEGOE(2)-S1 ensemble ................................. 77
4.7 Expectation values of the two pairing Hamiltonians and \( \hat{C}_2(SU(3)) \) vs \( \hat{E} \) for BEGOE(1+2)-S1 ........................................ 78
5.1 Block form of EGOE(1+3)-s ensemble ........................................... 88
5.2 Ensemble averaged eigenvalue density for EGOE(1 + 3)-s ............... 89
5.3 Average-fluctuation separation for EGOE(1 + 3)-s ...................... 90
5.4 Nearest Neighbor Spacing Distribution for EGOE(1 + 3)-s ............ 91
5.5 \( \Delta_3 \) statistics for EGOE(1 + 3)-s ........................................ 92

6.1 Variation of \( \langle r \rangle \) and \( \langle \tilde{r} \rangle \) with respect to \( \lambda \) for \( H_{3 \times 3} \) ensemble .......... 108
6.2 Variation of \( \langle r \rangle \) and \( \langle \tilde{r} \rangle \) with respect to \( \lambda \) for \( H_{d \times d} \) ensemble ........ 109
6.3 Variation of \( \langle r \rangle \) and \( \langle \tilde{r} \rangle \) with respect to \( \Lambda \) for \( H_{d \times d} \) ensemble .......... 110
6.4 Mapping between \( \lambda \) and \( \Lambda \) ................................................. 111
6.5 \( P(r)dr \) analysis for BEGOE(1+2)-F ........................................ 112
6.6 \( P(r)dr \) analysis for BEGOE(1+2)-S1 ..................................... 113
6.7 \( P(r)dr \) analysis for Heisenberg’s XXX model ............................ 114
6.8 Variation of \( \langle r \rangle \) and \( \langle \tilde{r} \rangle \) with respect to \( \varepsilon \) for Heisenberg’s XXX model 115
6.9 \( P(r)dr \) analysis for Heisenberg’s XXZ model ............................. 116
6.10 Variation of \( \langle r \rangle \) and \( \langle \tilde{r} \rangle \) with respect to \( \varepsilon \) for Heisenberg’s XXZ model 117
List of Tables

2.1 Dimensionality and Independent Matrix Elements ............................. 13
2.2 Variation of interpolating parameter $\mu$ with respect to the rank of $k$-body interaction ................................................................. 16
3.1 Root Mean Square deviations ($\Delta_{\text{RMS}}$) for each $F$ spin ........... 36
3.2 Inputs to calculate fixed-$F$ centroids and variances for given $\Omega$ ...... 37
B-1 $U(\Omega) \supset SO(\Omega)$ reductions for $\Omega \geq 4$ for BEGOE(1+2)-$S1$ .......................... 128
