LIST OF TABLES

Table 1: Availability of Fruits and Vegetables Per Continent (kg/capita/year) ...................... 49
Table 2: Availability of Fruits and Vegetables in some SSA Countries (kg/capita/year) ........ 50
Table 3: Prevalence of Low Fruits and Vegetable Consumption in Selected SSA Countries in 2002/03 ........................................................................................................ 52
Table 4: Characteristics of Sustainable Urban Agriculture, by Level .................................. 67
Table 5: Sustainability Indicators Used in Studies on PUA .................................................... 69
Table 6: Variables Included in the Efficiency Effect Model .................................................. 81
Table 7: Annual Growth Rate of Real GDP ........................................................................... 90
Table 8: Absolute Growth Rate of the Major Sectors .............................................................. 91
Table 9: Percentage Share of Major Sectors in GDP .............................................................. 92
Table 10: Contribution of Major Sectors to Growth Rate of GDP ........................................ 94
Table 11: Area Cultivated and Yield of Cereals for Selected Years ..................................... 99
Table 12: Production of Major Cash Crops in 2001/2002 ....................................................... 100
Table 13: Estimated Number of Livestock in Selected Years .............................................. 101
Table 14: Livestock Products Produced by Private Holders of Rural Families (in millions) .... 102
Table 15: Annual Vegetable Production of Ethiopia, 1993-2003 .......................................... 104
Table 16: Cultivated Area and Yield of Vegetables ................................................................. 105
Table 17: Vegetable Consumption Pattern of Selected African Countries ......................... 106
Table 18: Value of Vegetable and Fruits Exports (in million Birr) .......................................... 107
Table 19: The Structure, Diversity, Resources and Production of PU Agriculture in Ethiopia. 110
Table 20: Gender and Age Distribution of Respondents ....................................................... 116
Table 21: Marital Status of the Respondents ......................................................................... 117
Table 22: Distribution of Respondents’ Household Size ....................................................... 118
Table 23: Distribution of Farmers by Educational Level and Town ........................................ 120
Table 24: Migration Status of Respondents.............................................................................. 121
Table 25: Distribution of Respondents’ Food Sources and Food Security Status ...................... 122
Table 26: Respondents’ Occupational Characteristics................................................................. 123
Table 27: Distribution of Respondents’ Farm Experience.......................................................... 124
Table 28: Primary and Secondary Sources of PU Vegetable Farmers Income ....................... 125
Table 29: Summary of Farmers’ Annual Income from Various Activities ............................... 127
Table 30: Summary of Off-Farm Income Sources...................................................................... 128
Table 31: Factors that Motivated PU Farmers to Engage in Vegetable Farming ...................... 129
Table 32: Summary Statistics of Land under Vegetable Production .......................................... 130
Table 33: Distribution of Respondents’ Plot Size and Farm Size ............................................. 131
Table 34: Types of Vegetable Products Mainly Grown by Respondents ................................ 132
Table 35: Vegetable Production Cycle per Year ......................................................................... 133
Table 36: Vegetable Farmers Source of Finance ........................................................................ 134
Table 37: Frequency Distribution of Major Customers ............................................................... 135
Table 38: Summary Statistics of the Major Variables .................................................................. 139
Table 39: OLS Estimate of the Stochastic Model...................................................................... 141
Table 40: Estimates of Translog Stochastic Production Function under Half-Normal Distributional Assumption .......................................................................................... 142
Table 41: Partial Elasticities and Returns to Scale ..................................................................... 144
Table 42: Summary Statistic of Technical Efficiency Distribution from Stochastic Model ...... 145
Table 43: Frequency Distribution of Technical Efficiency Estimates ........................................ 146
Table 44: Summary Statistic of Farm Level Technical Efficiency Scores ................................... 147
Table 45: Comparison of Input Utilization of Farmers by Efficiency Groups ............................ 148
Table 46: Summary of Potential Yield and Actual Yield Estimation by Efficiency Category .... 149
Table 47: Two Limit Tobit Model Estimates for factors affecting Farmers’ Technical Efficiency
..................................................................................................................................................... 151

Table 48: Summary Statistic of Vegetable Income ................................................................. 155

Table 49: Farmers’ Own Estimation of Annual Profit from Vegetable Farming .................... 156

Table 50: Statistics of Annual cost, Revenue, and Profit of Vegetable Farmers .................... 157

Table 51: Farmers Assessment of the Importance of Vegetable Production ............................. 159

Table 52: Farmers Who Had Received Trainings on Environmental Issue ............................. 161

Table 53: Farmers Perception on the Environmental Impact of PU farming ........................... 162

Table 54: Number of Farmers Who Believed that Farm Inputs Have Negative Impact ............ 163

Table 55: Farmers Attitude Towards the Impact of Chemical Inputs ....................................... 164

Table 56: Farmers Proposal to Prevent Environmental Damage .......................................... 165

Table 57: Type of Water Used by PU Vegetable Farmers ...................................................... 167

Table 58: Farmers’ Feeling on the Right to Produce Vegetables ............................................ 170

Table 59: Number of Farmers Who Had Access to and Received Credit in 2011/12 ............... 171

Table 60: Summary Statistic of Loan Received by Respondents in 2011/12 ........................... 172

Table 61: PU Vegetable Farmers’ Access to Extension Services ............................................. 173

Table 62: Primary Sources of Technical Advice to PU Vegetable Farmers’ ........................... 174

Table 63: Percentage of Farmers Complaining on Major Vegetable Marketing Problems ....... 177
