

CONTENTS

CHAPTER	Page
1. INTRODUCTION	1-31
1.1. Heterojunctions and Heterostructures	1
1.2. Classification of Heterojunction	6
1.3. Metal - Semiconductor Junctions	10
1.4. Double Heterostructure	12
1.5. Multilayer Heterostructure	14
1.6. Role of Strain in Heterostructure	15
1.7. Historical Review of Heterostructure	17
1.7.1 Fundamental physical phenomena in classical heterostructures	18
1.8. Applications of III-V Nano-Heterostructures	21
1.9. Presented Work	25
References	26
2. THEORETICAL DETAIL	32-55
2.1 Energy Band Structure	34
2.1.1 Pseudopotential method	36
2.1.2 Tight-binding method	37
2.1.3 The $k \cdot p$ method	37
2.2 The $k \cdot p$ equation	39
2.2.1 Multi-band model	40
2.2.2 Eight-band $k \cdot p$ hamiltonian	40

2.2.2.1	Without spin-orbit interaction	41
2.2.2.2	Inclusion of spin-orbit interaction	42
2.3	Strain Distribution	46
2.3.1	Eight-band strain hamiltonian	50
	References	53
3.	MODELING AND SIMULATION	56-86
3.1	Electronic Band Structures	56
3.1.1	Wurtzite GaN	57
3.1.2	Wurtzite InN	59
3.1.3	Wurtzite AlN	61
3.1.4	III-V ternary compounds	63
3.2	Modeling of Heterostructures	67
3.3	Modeling of Semiconductor Nano-heterostructures with Nextnano ³	74
3.4	Modeling Detail	77
3.4.1	Cluster specification	80
3.4.2	Materials and alloy profiles	81
3.4.3	Doping and impurities	82
3.4.4	Quantum regions and clusters	85
3.4.5	Band structure and densities: Output detail	85
	References	86
4.	RESULT AND DISCUSSION	87-131
4.1	Introduction of Polarization	87
4.1.1	Spontaneous polarization	87

4.1.2	Piezoelectric polarization	88
4.2	Strain in III-V nano-heterostructures	90
4.3	Energy Band Structure	99
4.3.1	For simulated model of GaN/Al _x Ga _{1-x} N	99
4.3.2	For simulated model of InN/Al _x In _{1-x} N	110
4.3.3	For simulated model of InN/Ga _x In _{1-x} N	120
	References	130
5.	SUMMARY AND CONCLUSION	132-137
	Future scope of the work	136
	References	137
	LIST OF PUBLICATIONS	138-139
