# Contents

1. Abstract.................................................................................................................. vii
2. List of figures and tables...................................................................................... viii
3. Introduction............................................................................................................ 01
   3.1 History of network computing ................................................................. 01
   3.2 What is mobile agent? .............................................................................. 03
      3.1.1 Applications of mobile agents. ...................................................... 07
      3.1.2 Features of mobile agents. .......................................................... 09
   3.3 Pervasive computing.................................................................................... 16
      3.3.1 Computational trends ................................................................ 19
      3.3.2 Applications .............................................................................. 20
   3.4 Data mining................................................................................................... 20
   3.5 Research applications................................................................................. 24
4. Motivation/Related work .................................................................................... 28
   4.1 Research issues in mobile agents. ............................................................. 30
   4.2 Research issues in pervasive computing................................................... 32
   4.3 Research issues in data mining.................................................................. 36
5. Research issues addressed................................................................................... 41
   5.1 Resource discovery...................................................................................... 41
   5.2 Effectiveness of mobile agents- an issue.................................................... 47
      5.2.1 Variation of RTT w.r.t size of agent............................................. 47
      5.2.2 Performance of Jade, Aglet and FTP for file transfer............... 49
      5.2.3 Performance of agent involving huge computations ............... 50
      5.2.4 Performance of Jade and Aglet for distributed searching ....... 51
      5.2.5 Comparison of performance of mobile agents (Aglet & Jade) with
traditional sorting techniques.............................................................. 52
      5.2.6 Effectiveness of mobile agents in distributed data mining....... 53
   5.3 Security issue in mobile agents applications............................................. 68
   5.4 Agent tracking.............................................................................................. 77
   5.5 Autonomous/Intelligent systems............................................................... 84
