DEDICATION

This thesis is dedicated in memory of my Mother Late Bimala Devi who was delighted at my venture into the research and had been very fondly waiting for successful completion of my work.

But today when the work is actually over she is no more to rejoice the success.

However in the context of my research I realise what would be a real parenting and for that matter how much of sacrifice she must have made to grow me up and making of a person in me.

Date: 09.01.2009
New Delhi.
