I owe to many well-wishers who are with me today, and a few who have left this world not with me at this moment to share this. The idea of higher studies was always within me but it was brought out by few, watered and supported by many, protected and guided by few, and also willingly suffered by a few. I am indebted to all.

I truly believe that this work would not have been possible without the guidance of Dr. Sanjeev V Thomas, Additional Professor, Department of Neurology, and Principal Investigator of Kerala Registry of Epilepsy and Pregnancy (KREP) who brought out the real researcher in me. I bow before you Sir, for your timely support, receptiveness, being a true master and a perfect time manager. You knew how to bring out the best in me through frequent interactions and motivations.
