List of Tables

Chapter I. Introduction

Table 1.1. The International League Against Epilepsy classification of epileptic seizures 5
Table 1.2. The International League Against Epilepsy classification of Epilepsies and Epilepsy Syndromes 7
Table 1.3. Health care issues for women with epilepsy 11
Table 1.4. Percentage of household showing number of usual members in Kerala 18

Chapter II. Review of Literature

Table 2.1 General principles of drug therapy in preconception period and pregnancy 44
Table 2.2 Categories of congenital malformations – Australian registry 54
Table 2.3 Percentage of Major congenital malformations reported by the Registries 55
Table 2.4. Domains of child rearing practices in early infancy 59
Table 2.5. AEDs in breast milk as a proportion of blood levels 65
Table 2.6 Breast milk - Anecdotal side effects vs advantages to infants 66
Table 2.7. Simplified Developmental Information Chart – 1 67
Table 2.8. Developmental problems after in utero AED exposure 71
Table 2.9. Immunisation coverage 72
Table 2.10 The Trivandrum CDC Model for neonatal developmental intervention 75
Table 2.11. Stimulation programme of CDC Trivandrum model during the 0-3 months 76
Table 2.12. Modified Stimulation programme of CDC Trivandrum model during the 0-3 months 77
Table 2.13. Literature search in Pubmed 91
Chapter III. Materials and Methods

Table 3.1. Units of Self Instructional Module

Chapter IV. Analysis and Interpretation

Table 4.1. Comparison of age at marriage, present age, and age of husbands of WWE and WWoE

Table 4.2. Comparison of gravida status, parity status, abortion/stillbirth and Body Mass Index

Table 4.3. Distribution of sample according to educational and occupational status, and Standard of Living Index

Table 4.4. Distribution of sample according to family characteristics, religion, place of residence, and reading habits

Table 4.5. Antenatal Health Index of WWE and WWoE

Table 4.6. Child Rearing Knowledge of WWE and WWoE at base line

Table 4.7. Child Rearing Knowledge of WWE and WWoE at third visit

Table 4.8. Child Rearing Practices of WWE and WWoE at third visit

Table 4.9. Mean, Standard deviation and p values of Visual Analogue Scale and Maternal Involvement Scale of WWE and WWoE

Table 4.10. Frequency and percentage distribution of pregnancy outcome of WWE and WWoE

Table 4.11. Baby outcome at birth and at 3-4 months of age, and Maternal outcome of WWE and WWoE

Table 4.12. Clinical characteristics – Age of onset of epilepsy among intervention and control group of WWE

Table 4.13. Clinical characteristics - Type of epilepsy among intervention and control group of WWE at Baseline.

Table 4.14. Seizure frequency during pregnancy by intervention and control group of WWE

Table 4.15. Post partum seizures and AEDs by Intervention and Control group of WWE
Table 4.16. Comparison of age, age at marriage, and age of husbands of WWE by intervention and control group 141
Table 4.17. Comparison of gravida status, parity status, abortion/stillbirth, and Body Mass Index of WWE by intervention and control groups 142
Table 4.18. Distribution of WWE according to educational and occupational status, and Standard of Living Index 144
Table 4.19. Distribution of WWE according to family characteristics, religion, place of residence, and reading habits by intervention and control groups 146
Table 4.20. Antenatal Health Index of WWE by intervention and control groups 147
Table 4.21. Mean, Standard deviation and p values of Child Rearing Knowledge score of WWE in the intervention and control groups at base line 148
Table 4.22. Mean, Standard deviation and p values of Child Rearing Knowledge score of WWE in the intervention and control groups at third visit 149
Table 4.23. Mean, SD and p values of Child Rearing Practices of WWE in the intervention and control groups 150
Table 4.24. Mean, SD and p values of Visual Analogue Scale and Maternal involvement scale of WWE in the intervention and control groups 151
Table 4.25. Frequency and percentage distribution of pregnancy outcome of WWE by intervention and control group 153
Table 4.26. Mean, SD and p values of baby outcome and maternal outcome of WWE in the intervention and control groups 154
Table 4.27. Exposure to intervention: Reading the SIM/booklet by WWE and their opinion 155
Table 4.28. Opinion towards marital and family life for WWE 156
Table 4.29a. Predictors of baby outcome at 3-4 months post partum 158
Table 4.29b. Predictors of baby outcome at 3-4 months post partum 159
Table 4.30a. Predictors of child rearing practices 160
Table 4.30b. Predictors of child rearing practices 161
List of Figures and Flow charts

Chapter I. Introduction
  Fig.1.1. The conceptual framework 29

Chapter III. Materials and Methods
  Fig.3.1. The study design 94
  Flow chart 3.1. Patient recruitment and follow up plan 99

  Flow chart 3.2. WWE eligibility & recruitment status 101
  Flow chart 3.3. WWoE eligibility & recruitment status 102

Chapter IV. Analysis and Interpretation
  Fig. 4.1. Mean, S.D of pre and post-test Child Rearing Knowledge of WWE and WWoE at third visit 126
  Fig. 4.2. Mean, S.D of Visual Analogue Scale scores of WWE and WWoE at third visit 129
  Fig. 4.3. Mean, S.D of Maternal Involvement Scale scores of WWE and WWoE at third visit 130
  Fig.4.4. Correlation between Child Rearing Knowledge and Child Rearing Practice 135
  Fig.4.5. Bar Graph showing Child Rearing Knowledge and Child Rearing Practice 136
