Acknowledgment

A fascinating journey ... a roller coaster ride ... a mosaic of myriad emotions ...

I can think of a dozen such clichés to describe my Ph.D. But it has been much more than all of these put together. It has been an experience that has shaped/moulded/sculpted my being such that I am actually looking forward eagerly to the challenges that life will be throwing at me, secure in the knowledge that I have gained all that I need to overcome each one of them. I take this opportunity to acknowledge everyone and everything that has helped me become the person that I am.

I must begin by thanking two former Deans of the School of Information Technology, two pillars of the School, Prof. Alok Bhattacharya and Prof. Ram Ramaswamy. Apart from building and nurturing a whole school from scratch, one of their major contributions has been the free, fair and friendly working environment of the School, which provided me the courage to express my opinions without fear of repercussions.

Dr. Andrew Lynn, my supervisor, has been a major shaper/moulder/sculptor during the Ph.D, constantly chiselling away, converting my raw, naive and often unstructured thoughts into science. I thank him for providing me space and freedom and nurturing my abilities. His constant encouragement pushed me to perform much better than anything I could have imagined myself capable of.

I was really fortunate to have a group of colleagues who also doubled up as friends and family both inside as well as outside the lab. This really blurred the lines between home and the workplace and turned work into a thoroughly enjoyable experience. The things that I have learnt from them will stay with me forever. Here, I attempt to take a snapshot of each of them which I will keep on going back to for the rest of my life:
Vivek simple, straightforward; his activism inspired all of us; the way he has handled his responsibility toward his siblings should be a lesson to all;

Alok ever-smiling, ever-present, ever-ready to help; his special imagination and sense of humour has lightened up many a tense moment;

Anchal worldly-wise demeanour; the ability to never give up;

Raghu strong conviction, firm belief in one's dreams and the systematic, and a whole lot of thorough meticulous planning that goes into sticking to one's dreams

Soumya steely determination coupled with a pleasing nature; majority of my PERL knowledge has come from watching him code;

Candida sweet as candy; but also self-assured;

Rajeev projecting oneself is as important as important as doing the work;

Sonika efficient management of time and resources;

Payal unique combination of spunk, pluck and courage;

Hemant dedication; sincerity; hard work;

Anupama sticking to your guns and charting your own course no matter what the odds;

Kamal dream big; ambition is not a crime, lack of focus is!

Rithun it is never too late!

Vikram sense of dedication to a cause;

A special and heartfelt thanks to Rajeev, Kosalai, Pramod Tiwari, Rahul for livening up my lonely Brahmaputra days with endless rounds of music and laughter.

All the faculty at the School of Information Technology have been very encouraging. I thank Dr. Chari, Dr. N. Subbarao, Dr. Pradipta Bandyopadhyay, Dr. Narinder Sahni, Dr. Supratim Sengupta and Dr. Lovekesh Vig for always treating me with utmost dignity and taking my silly questions and explanations during presentations in the right spirit. This instilled tremendous confidence in me regarding my scientific growth. I
am immensely thankful for the valuable and critical comments provided by the members of my doctoral committee Dr. Chetan Chitnis (ICGEB), Prof. J. Subbarao and Dr. Devapriya Choudhury, which helped me streamline my work.

I sincerely acknowledge the financial support provided by the University Grants Commission without which it would have been difficult to survive and the travel support for attending the ISMB conference in Vienna which was provided by the CCBB DBT-CoE grant. The office staff (Rajeevji, Kuldeepji, Mandalji and Arun) deserve thanks for their co-operation and help in dealing with administrative issues.

I must thank the project students Vasantika, Ipsita, Ankita, Vasu and Ishaan for choosing to work with me and bearing with me patiently.

Words are not enough to describe the importance of my dear wife Falguni in my life. She has been and will always remain my best friend, my agony aunt, the constant voice of reason in my life... in other words... she completes me and I cannot imagine my life without her... ever! My family has been the rock solid foundation that has loved and supported me unconditionally ever since I came to Delhi seven years ago. Their sincere love and affection, even in the face of neglect on my part, is what inspires me to achieve all that they have dreamt for me. I salute my parents and my sister Kinjal for showing so much faith in me and bearing with my ways and I hope that one day I would be in a position to fulfil all their needs, like they have done for me until now.

Dhwani
