ACKNOWLEDGEMENTS

To acknowledge in mere words is never enough to thank the people who played significant role directly or indirectly to shape my career. My sincere thanks and sense of gratitude are extended to all of them. Foremost, I would like to thank the Almighty Who Has provided me this wonderful opportunity to acknowledge them who are the precious part of my life. I pray to Him to bless me always and enlighten me towards the path of meaningful and successful life as a good research as well as good human being.

First I would like to thank my supervisor, Prof. Rajendra Prasad who shared with me a lot of his expertise and research insight. His enthusiasm, inspiration, and great efforts to explain things clearly, simply steered me in the right direction. The door to his lab was always open whenever I ran into trouble or had a question about my research. His never-ending energetic attitude fascinated me a lot to finish the work without getting tired. Thank you very much Sir for every thing.

I would like to thank all the faculty members of SCMM. My special thanks to the present chairperson Dr. Rakesh Tyagi for his constant encouragement, ever caring and helping attitude. I also appreciate the help and support rendered by Dr. C.K. Mukhopadhyay and Dr. Suman K. Dhar. I also extend my sincere thanks to Dr. Saima Aijaz and Dr. Dipankar Ghosh.

I would also like to acknowledge Mr. B.A. Khan, Mr. A.C. Alexander, Mr. S.K. Sharma, for extending their help. Special words of thanks go to my teachers, Prof. Nehal and Prof. Samad Ansari. I appreciate their always-welcome attitude and long yet patience filled discussions. I would also like to express my sincere gratitude towards Prof. Ashfaq Ashraf and Ansarul Haque for their motivation and encouragement.

I don't have words to express thanks to my friends who have helped me in finishing this work. The burden of writing this thesis was lessened substantially by the support and humor of my lovely lab mates; Shipra, Gopal Jee and Navin. The silent and usually calm, cool performer Shipra always stood behind me in all the trouble days of my SCMM life. Her help and support is exceptional through out my SCCM time and I don't find words to appreciate her, simply it is unforgettable. My best wishes for her brilliant future........All the best. The help and concern extended by Gopal jee Gopal is never forgettable. His unique talent as being a strong critic and mature sense of attitude as well as his leading ability is always a treasure for us. During my writing moments he carefully reviewed chapters, politely pointed out glaring mistakes, and always expanded my vocabulary. I would like to wish him all the success in life and may his all dream come true. I also want to acknowledge my junior most lab mate Navin kumar who gave his silent but sankatmochak performance during thesis writing. His never ending attitude and ready to do and die for any challenge is a rarest of the rare quality of my junior most lab mate. I wish for his bright future and for his brilliant companion.
I would never be able to forget the cherished moments that I have spent with my friend Ritu, who with her always ready to help attitude became a part of everybody's life. Her untiring help during my late stage Ph.D work is exceptionally appreciable. I wish her for all the success in her life. Thanks a lot for so much support and concern........Good luck.

I also wish to thank Dr. Jagannath for his help and concern. The gift of his company made my days more enjoyable and worth living, especially his late night songs were a constant source of entertainment. I will never forget the moments of fun during the midnight adventurous 'jungle yatra'.

I would always treasure the special times spent with Ali, Tulika, sudhanshu, Ritu, DB. Simply, their company made my days of research work more enjoyable and easy going. I also wish to thank all my colleagues of past (Nivedita, Sudhakar, Naseem, Versha, Prasad, Neeraj, Saradhi, parul, dolaj) for their assistance during the progression of this research.

I would never be able to forget the cherished moments that I have spent with my friends Nagendra, Ashraf, Ashish, Nupur, Subodh, Sunil, Sudipta, Sanjay, Rachna, Dr. Sanal. Their help and concern are amazing.

I would also like to thank Nidhi, Khyati, Manisha and Hina, Saif, Ajit, Ashutosh, Manpreet, Kalpana Indresh for their support and cooperation. I shall remember all the help extended by Antresh, especially in providing strains and plasmids through out my work. It is a pleasure to thank Raman, Monika and Sanjiveeni for their ever-extended hands of help and concern through out my work till the end of writing. My best wishes for their future success. Finally, I cherish the moments spent with them in 101 lab-SLS.

Birendra Bhai deserves special mention. He had been a great help especially during my gene sequencing. I don't have words of gratitude to express my thanks. His wonderful presence always made the lab environment cheerful.

I am tempted to individually thank all of my friends, however, because the list might be too long and by fear of leaving someone out, I will simply say thank you very much to you all. Still few names deserves mention like Ramgopal, Nisha, Amit, Atul, Sangeeta, Vikash, Sandeep, Seema, Swagata, Priyanka, Bharati, Ekta, Pallabi, Abhijeet, Kavita.

I would like to express my cordial thanks to Nand Kumarji for his outstanding help. His ever helping and untiring efforts as well as with always-available attitude made things smooth for all of us in SCMM. The help and concern shown by Nareshji is unforgettable. There have been countless moments when he has gone out of the way to help me. I would like to thank the silent performer Chota Rajesh who is an asset for SCMM students. I also extend my thanks to Omprakash, Deepak, and Asharam. How can I forget mentioning Pratima and Shankar for their unconditional help and supports. Their generous efforts to make things easy are greatly acknowledged with lots of thanks. The help extended by Reema, Gagan, and Vijender deserves special mention.
I would also like to mention the names of few friends whom I always found beside me during the lows and highs in my life. Thank you Sadul, Irshad and Firoz bhai for being my best friends. It's my pleasure to mention my friends Zeya, Irfan and Sajjad Kreem, who have been attached to me is memorable.

Last but not the least; I would like to thank all my family members. I feel a deep sense of gratitude for my father and late mother who formed part of my vision and taught me the good things that really matter in life. The sacrificing ways of my father and his never-ending prayers gave me the killer instinct to achieve my goals. The happy memory of my mother still provides a persistent inspiration for my journey in this life. I am deeply touched by the support of my brothers; Abrar, Anzar, Ahrar. They have always boosted my confidence and have given me the courage to fight with all adversities in my life. Simply, I would not have been anything without them; I have no words to express my feelings for my sisters who have always uplifted me in my weak moments. I am falling short of words to thank Huda who has always stood by my side like a pillar of strength. I am deeply touched by the endless love and support that she rendered me throughout my Ph.D. The chain of my gratitude would be definitely incomplete if I would forget to thank my extended family including cousins for providing a loving environment for me. I will simply say thanks very much to you all. Some of them are, anyway, quite lucky: who deserves for special mentioning such as Rehab, Abeer for their love and affection and of course lovely sameera's company is unforgettable in my days of tension.

I cannot finish without saying how grateful I am to my late grand parents and uncle who taught me all the principles and values of life. May Allah forgive their sins and take them in jannah (Ameen). It would be injustice towards the rest of my Uncle and Aunts if I don't mention their unconditional love and support. There have been countless moments when my uncles have supported me, shared my problems and have helped me to emerge out of them successfully. Words are not enough to say thanks to them for their cooperation and extended help.

I apologize to those whom I might have inadvertently forgotten to mention and acknowledge by name.

Financial assistance from ICMR and CSIR in the form of JRF and SRF respectively is gratefully acknowledged.

July 2008
