ACKNOWLEDGEMENT

The journey of PhD would not have been accomplished without blessings of those who compassionately stood by...helping hands of those that generously rose for...in all ups and downs!

I am fortunate being showered with the blessings and compassion of my esteemed supervisor and mentor Prof. Pramod Kumar Yadava. He offered me the liberty and opportunity to pursue the ideas in PhD under his able guidance. He always stood by me in all circumstances. His crystallized views and critical suggestions could shape this work. His persistent encouragement and intellectual freedom given to me would always be the source of creation in the exploration of further studies.

I am indebted to all my teachers who showed me the path of knowledge, tolerance and quest for curiosity.

My thanks goes to my lab mates, SLS community members, friends, companions and all my well-wishers who were the fellow-travelers of my research.

I am very grateful to the Dean, SLS, Prof. R.K. Kale and previous Dean, SLS, Prof. Pramod Kumar Yadava for providing me equipped facility in CIF and lively environment in SLS. Events of Biospark and celebrations of Spandan were great refreshment and a get-together.

My gratitude goes to Dr. Vandana from IARI for her generous help of IEF-strips. I remember her gentle and kind attitude. I also extend this gratitude to Mr. Hardip from ICGEB for spending his valuable time in discussion and demonstration of 2D gel casting unit.

I would be very obliged to acknowledge CSIR for providing me scholarship to accomplish the task of PhD Programme.

I am very much thankful to the family members of SLS from CIF: Khan Sir, Alexander Sir, S.P. Sharma Sir, S.K. Mishra Ji, Aslam Ji, Meena Ji for their love and timely cooperation to me while working in CIF. I am grateful to SLS, administrative office family members, Ganguli Ji, Mam Raj Ji, Ramesh Ji, Pehaluddin Ji, Shambu Ji, Satish Ji, Butola Ji, Mange Ram Ji, Vinod Ji, Ram Kripal Ji for their help and support. I extend my hearty thanks to Meenu Maam and Shiny Maam for their caring attitude and offering me all time help.

I cannot forget the company of my lab mates who are the most cherished part during my PhD programme. I am very lucky to have them such as Dr. Pradip, Dr. Ravindra, Dr. Anju, Suresh, Jitendra, Rajendra, Vijay, Anshuman, Chanchal, Jyoti, Ashima, Prashant, Akhil and Hussain. I remember early days with Dr. Pradip, Ravi, Anju, Jitu, Raj and all members of that time who were always refurbished with full of joy and sense of humor and ready to bear my short-poems that I shared with them during tea time in canteen. I am glad to offer thank to Suresh for his valuable suggestions, fruitful discussions and updates on literature regarding telomerase and cancer biology. Moreover the assistance of Chottelal Ji to sort out the problems during work would always be regarded the best co-ordination.
I would be grateful to all my batch-mates: Kamal, Vikas and his spouse Puja, Manoj from SES, Prasad and his spouse Angana, Sudhanshu and his spouse Sanghmitra, Sanjay, Manoj Kumar, Vijay, Ganesh, Jitendra, Anil, Zubeda, Bimala, Dola and Krishna Prakash (KP). They were always there to help me out in any moment anywhere. I treasure those memorable moments of stage show I performed with Sudhanshu, Dibyendu and Manoj in cultural program of Spandan.

I am very delighted to convey my best regards to my friend Kishan Ji (KP) who was the fellow-traveler of my struggle and hardship during my studies. I found him like a pillar of support in all good and bad times. Also, I would like to acknowledge my other friends like Audesh and Anil for their unconditional support and care.

My sincere thanks goes to my friends from SBT and SES who were supportive and cooperative during research. They are Dr. Subhash, Dr. Neeraj; I remember their generous help for 10L Mili-Q water during crisis in SLS that could help me to perform 2D experiments. I also can not forget the all time assistance offered by Dr. Vivek, Anup and Anuj to me, especially, in fluorescence imaging and photomicrography.

I express thankfulness to my friend Mr. Rajiv (SIT-Bioinformatics) for his incredible help in finding binding motifs of transcription factors in various promoters of the genes. I would love to acknowledge Vivek Ji (SIT-Bioinformatics) for his valuable discussions on bioinformatics and its applications in wet-lab research. His unconditional support and caring attitude would be the strength of great friendship.

I am nostalgic about those nights I spent during experiments and writing the thesis. In such a moment the company of Mr. Ravi (SLS) and Saurabh has been a motivating factor at a time of stimulating discussions on science, career and multi-aspects of life during having a tea at 24x7 dhaba in the nights of chilled winter.

I thankfully cherish the thoughtful suggestions and sincere attitude of Mr. Mahendra Ji, Satpal, Sanju, Vijay, Rakesh, Hanumanta, OP Ji, Sachin saab, Arshad saab and Shyam.

I have no words to express my profound sense of gratefulness for my CIF friends, Saurabhb, Ashish, Jugendra Ji, Pankaj, Pratik and Vikrant Ji for their devoted-help and persistent support in 2D, MALDI and flowcytometry experiments. I admire Ashish for his support he gave me to initiate the 2D experiment. I also extend the gratitude to my friend Jugendra Ji who assisted me in MALDI analysis and MALDI-protocol. I have hearty regards and love for my younger friends Pankaj and Pratik for their support in flowcytometry experiments and analysis. I appreciate Vikrant Ji for his valuable suggestions in schematics and thesis.

I have deep respect and appreciation for Dr. Nita. I admire her spirit of work, jovial nature and vibrant smile. I feel fortunate for having encouragement and cheerful support while making the thesis more vivacious with full of rainbow.

I would like to acknowledge with great feelings of kind regards to my vehicle Maruti-800 (DL-2CK-3316). I attribute all those days and nights of work during chilled winter for five consecutive years and all my happiness to my car as it could make the travel safe especially in nights, bring several moments of joy and keep me happy in all times.
I would love to acknowledge my friend Mr. Farid. I admire his critically evaluated suggestions in thesis. I have an enduring back up of care and concern from my beloved friend Mr. Ashutosh.

Eternal flow of inspiration I always have from my dear friend Subhradip saab and his spouse Ruby. Their care and love for me would not be expressed in words. I could perceive the ‘art of science’ through the outstanding insight of him. I could perceive the ‘science of art’ through the wonderful philosophy of him. I cherish the liberty of learning in those days and nights we spent together with full of science and philosophy in his lab at AIIMS. An incomparable support and concern from both Miya and Biwi during PhD would always be the kindled sentiment in heart.

Here..., my fingers came to a standstill while writing....I breathe deep, shut my eyes and delved into the very beginning of the journey, I started from Kolhapur. No wonder! My heart was full of gratitude and love for my affectionate friends of native place, Appasaab, Prakash (Paka seth), Sanju (Master), Sunil saab, Amit saab, Sachin & Sachin, Dipak, Rafik saab, Kishor saab, Ranjit, Harun, Abhiraj, Vivek, Sunil, Hemant saab, Anand, Suhas Ji, Firoz, Rahul Awate & Rahul (Idali), Prashant, Sudarshan, Mahesh & Mahesh, Shivaji, Shivraj, Raju, Binay saab, Sanjay. Their timeless love, affection, encouragement and push-up to set the acceleration onto the journey of PhD and future endeavors would always be there.

I have deep gratitude for Sachin saab, Amit saab and Paka seth for their fullest support, love and care during PhD. Their visit in JNU could bring moments of utmost happiness to me.

Last but not the least, feelings of affection with deep respect and gratitude are beyond the expression in words for my family. My late mother and father would always be the everlasting source of strength and tolerance. My thesis is a humble and heartfelt tribute and worship to them. I have deep gratitude for my Shaku Mausi and Kaka for their parental love and care.

My family members are pillars of my strength and trust. I have motherly love and care from my elder sister Maya and my beloved brother-in-law Ramesh Ji from whom I always gain wisdom and spirit of happiness. I adore my elder brother Milind Raj and Madhu Vahini and younger brother Prasad for their love, all-over support and care during PhD. My love and affection goes to my niece Reshma, Samruddhi and Akanksha.

Without the support and encouragement of my family members the thesis would not have been accomplished.

An experience of SLS is full of joy and sorrow. It was a great time being there. I owe each and every one for giving me the opportunity to express my sincere thanks to them.

Rahul Dev Malage
