ACKNOWLEDGEMENTS

It is by Gods grace and his willingness that I hereby place on record my deep sense of gratitude and reverence to all those who helped and encouraged me to complete this work.

First of all, I wish to express my profound gratitude to my supervisor Prof. B.C. Tripathy for introducing me to the world of Plant Molecular Biology. It was only due to his valuable guidance, cheerful enthusiasm and ever-friendly nature that I was able to complete my research work in a respectable manner. During my Ph.D., I was able to interact with him on routine basis, which helped me to learn many valuable things. His comments were incisive, his approaches pragmatic, his ideas are ingenious and kindness worthy of him. It is difficult to measure the quantum and quality of time Prof. Tripathy spent for me in discussing, clarifying and refining my half baked ideas. So, writing of this thesis has been a learning experience enriched by his characteristic openness to fresh lines of cogent scientific thinking. It is needless to say that he is a practical philosopher possessing profound wisdom in transcending reality and beautifully blends scientific cogent with the social reality.

I wish to express my warm and sincere thanks to Govindjee. I am fortunate enough get chance to talk with him over scientific progresses in the field of plant molecular biology and physiology.

I owe my most sincere gratitude to the present Dean, School of Life Sciences Prof. P.K. Yadava and former Deans of the School for their cooperation, supports and infrastructures provided to me. I am also greatly indebted to many teachers during course work in JNU for getting me interested in biological studies. They laid a strong foundation of scientific thinking and helped me developing my idea and vision on the same.

I would like to thank to my lab-mates Budhiji Rupeshjee, Ajay Bhai, Gopal Bhai, Ardhendu Sir, Ansuman, Satpal, Rajneesh, Naveen, Mamas, Namrata, Shiv, Ashutosh, Vivek, JP, Kanal, Vijay without whose generous guidance, essential instructions and constant encouragement, during the initial phase of my Ph.D, this thesis would have been a distant dream.

I wish to express gratitude UGC-CSIR for providing fellowship for this work.

I would like to thank all the administrative staffs for their cooperation and overcoming all the administrative red-tapism during various needs in JNU. It would not be a justification, if I will not acknowledge Meenu Ma’am, who is a very strong support for all the research scholars of SLS.

I wish to express my thanks to Mr. Sumer Singh for his full cooperation in official hassles. Day to day help of Ramesh, Baljit and Nathu - is duly acknowledged.

I thank all the CIF and CCIF members of SLS, especially Dr. Alexander, Dr. Sharma, Mr. Khan, Mr. Mishra Mr. Rajinder and the staff of CIF, SLS for their immense help and co-operation. I also thank Balwant and Aslam for their cooperation.

My working in the School of Life Sciences has been enriched by the company of Himjoyt, Narendra, Ruchi, Raj Gaurav, Versha, Mohan, Raghu, Shiteshu, Sunil Bhai, Rama, Swadhin, Ranjana ,som, Aashima, Jyoti, Monica, Ekta. It gives me immense pleasure to mention that they have provided me a
congenial atmosphere and always been cooperative in sharing their reagents, inspired and motivated with their new ideas and intellectual maturity.

I would like extend my heartfelt thanks to my dearest project trainee, Ram Gopal, Akash and KK. I will fondly remember the company of yours. Wish you all a happy, prosperous and a great life ahead.

I would like to thank all of my friends in JNU; Ansuman, Gopal Bhai, Ajaya Bhai, Nandini, Rana, Himanshu, Ritu, Versha, Sailesh, Manoj, Ravi, Rahul, Sudhanshu, Sanghu di, Divendu, Prasad, Sushma, Manju, Anjali, Bhupi, Rajender, Sanjay sir, for their socialization with me, together experiencing the life in the School of Life Sciences.

My parents are my pillars of strength who formed my vision, my way of living and are my inspirations. You gave breath to my life and skilled my tender steps to follow the path of righteousness. Sincere thanks to you, for your support during my hard days, not with the knowledge of science but with prayers and tender parental love. How could I live without you? My sisters and brothers, Myself, Babul, will still be that “crazy” brother in your company who only you appreciate!

And this piece of acknowledgements is just a simple and certainly inadequate token of my heartfelt appreciations for all of them.

Siddhartha
