ACKNOWLEDGEMENT

This is a matter of privilege to convey my sincere regards and love to those who helped me during the course of this study and without which this thesis would be incomplete.

It gives me immense pleasure to express my deep sense of regards to my supervisor Prof. P. S. Khillare for his scholarly guidance and excellent encouragement right from the selection of the topic to the preparation of this manuscript. I am grateful to him not only for his inspiration but also for the basics and philosophy pertaining to this investigation.

I also express my deep sense of regards to Prof. K. G. Saxena, Dean, School of Environmental Sciences, JNU for providing me the platform to carry out research and analysis.

I am indebted to Dr. E. V. Muley (Director, Ministry of Environment and Forests, Govt. of India) for his blessings, providing a great moral support and constant inspiration throughout the course of this study. I am also indebted to Mrs. Muley for her blessings and support like my mother.

The initial concepts regarding the study given by Prof. Rajendra Prasad, formerly National Professor, ICAR and Head, Div. of Agronomy, IARI, New Delhi is sincerely acknowledged.

I am grateful to Dr. H. Pathak, Principal Scientist, Div. of Environmental Sciences, IARI, New Delhi for his contribution in the basic framework of this study. The contribution of my friends Dr. D. S. Rana, Dr. K. P. Singh, Dr. Sanjeev Tripathi and Dr. Anupam Raj of IARI is duly acknowledged.

My special thanks to Prof. V. M. Pawar, formerly Vice Chancellor, MAU, Parbhani for his inspiration and encouragement that has paid a lot to me.

My special thanks goes to Dr. Pargat Singh and Dr. Vinod Kumar of Division of Environmental Sciences, Indian Agricultural Research Institute, New Delhi for their outstanding help both in analysis and writing of this manuscript. Thanks to Mr. Ramesh Harith for providing moral support. I am also thankful to Dr. Sudhir Sharma (Scientist, NPL).

I am thankful to Mr. Ved Nivas and Mr. Lakshman Singh for their unconditional support, help and cooperation as and when it was required; Mr. K.K. Sangmesh and Mr. Anil Singh for their help and encouragement.

I convey my sincere thanks to my lab mate Ms. Musarrat Parween for her constant help in preparation of this manuscript besides her own research work; and Mr. Sudeep Shukla for his sincere moral support. Both of them helped me in an intelligent manner writing this manuscript.

I am thankful to my friend Mr. Sanjay Sharma, who has always helped me in analysis and has given me moral support. I am also thankful to Mr. Om Prakash and Mr. Rakesh Ranjan for providing me time and support as and when it was required. I am thankful to Mr. Hoshiyar Singhji, Rawatji and CIF staff of the school for their help and support.
I would like to thank Sayantan for his constructive help, Darpa for his contribution, Pawan Kumar for his help in air sampling and all my colleagues of School of Environmental Sciences, JNU for their help and support during the course of this study.

Words are not enough to convey my heartiest regards to my parents whose blessings has shown me the path to complete this task. The constant inspiration and support of my family members particularly my wife Poonam, who has supported me in my difficult times; sisters Drs. Rajnee, Mamta and their family; elder brother Prabhat bhaiya and his family and younger brother Madhup is duly acknowledged.

The constant help and support given by Ranjan Dutt Tripathi and M. N. Tripathi is heart fully acknowledged.

My special thanks and love goes to my son Kushagra (6 yrs.) and daughter Shubhi (2 yrs.) for providing me time and giving me lovingly support during the entire period of this study.

Manoj Kumar Dwivedi
