Acknowledgements

At times our own light goes out and is rekindled by a spark from another person. Each of us has cause to think with deep gratitude of those who have lighted the flame within us. I am grateful to all those people who lighted that flame within me.

First and foremost I would like to express my deep sense of gratitude to my supervisor Dr. Alok K. Sinha who taught me like a teacher, inspired me like a friend and in numerous ways tolerated me like a parent. His constant motivation, concrete suggestions and deep involvement throughout the course of the present study were as exemplary as the complete independence he gave me for doing things in my own way. He came forward as an unwavering and strong support during the adverse moments and took the best care with great generosity. Each passing day, during the PhD tenure strengthened my belief that with no person, except him, could I have completed my work. I consider myself fortunate to work with such an enthusiastic person like him. Special thanks to his family for their wonderful company and hospitality during all the get-togethers at their home, Sanjay van picnics, and cricket matches etc. Thank you Sir for all the unconditional support and valuable guidance.

I offer my profound gratitude to Late Dr. Jayanti Sen for her guidance, moral support, unflinching encouragement and fuelling the much needed confidence in me. Her passion for science, exceptional determination and commitment for her students kept her working in lab even in the last days of her life. Her reminiscence as a "role model of hard worker" will always remain an inexhaustive source of inspiration throughout my life. I owe a lot to her in various ways and feel proud to be her student.

I thank Prof. Akhilesh Tyagi, Director, NIPGR, for giving a new hope and an interactive environment for better research in the form of SciEfflux.

I express my sincere gratitude towards Prof. Asis Datta, former Director, NIPGR, for providing an excellent infrastructure conducive to good research at the institute.

I would like to extend my heartfelt thanks to all the faculty members, Prof. Sushil Kumar, Drs. Sudip Chattopadhyay, Sabiyata Bhatia, Debasis Chattopadhyay, Manoj Prasad, Praveen Verma, and Shubhra Chakraborty for broadening my science knowledge during course work and Drs. Niranjan Chakraborty, Geetanjali Yadav, Manoj Majee, Ashverya Laxmi, Naveen Chandra Bisht and Mukesh Jain for their kind help in the hour of need.

I wish to thank all the staff members of NIPGR specially Mr. Sandeep Datta, Mr. Sudhir, Mr. Tapas, Ms. Rajni and Ms. Vineeta for their kind and ready to help nature in fulfilling office formalities. Special mention to the technical staff of the CIF, Ashok ji, Shobharam ji and Surendra ji. Working in CIF smoothly and hasslefree is a testament of their efforts. Their promptness and cooperation helped me to finish my experiments in time. Not to forget Dr. Vinod Kumar Sharma for his invaluable service to the library and Mr. Arun Kumar for maintaining the sequencing facility.
I am also highly thankful to all the teachers of my entire academic carrier for their blessings, guidance, support and encouragement especially Late Mrs. Mohini Ahuja who had a great influence on my life with her esoteric knowledge and Prof. I Usha Rao for inspiring me to pursue higher studies in research.

It was my good fortune for having been associated with seniors like Jyoti Batra (JB), Ajaswrata Dutta (Ajas) and Santosh Kumar (Santy) who took me on the process of learning and gave me immense support during my doctoral program. I don’t think I would be able to get a better set of seniors anywhere I go. JB was a good companion on an otherwise exhausting and disappointing experiments. I appreciate the rides with her which started on a pink bicycle in 1st year, moved on to bike in 2nd year and still continuing with her car. Both of us had a great time together, I wish her a bright future ahead. Thanks to Santy for keeping the lab atmosphere cheerful with his theories of time machine, aliens and many more. Apart from seniors, I had some great seniors in NIPGR who were very helpful throughout the tenure and I must mention their names, Kundu Da, Bhumi Di, Vijay sir, Kishwer, Chandru and Ramaiah. I would also thank Kamal for providing an experienced ear for my doubts about several experiments and Nasheeman for entertaining with her huge repertoire of anecdotes and stories.

I take this opportunity to thank my junior Dhammaprakash Wankhade (DPW), for his constant moral support. His suggestions helped me immensely in making this thesis intelligible to read. Many times, he had to bear the brunt of my frustration and rages against the world but he always stood up with me against all odds. I will cherish the memories of tea time (not so regular) breaks with him. I also benefited by several scientific discussions with him. He is more a friend than a junior to me. One simply could not wish for a better and friendlier junior. The times I’ve spent with Hema, Dipul and Vani have been a pleasure. Thanks for your help and company. I wish the best for your research endeavors.

It would have been impossible for me to conduct my experiments without the helping hand of the people who worked behind the scene. It is a pleasure to thank Rafiq (for his ingenious ways of working), Lokhi da, Atul ji, Bahadur ji, Manmohan ji and Mishra ji for all the help and untiring services. I also acknowledge Sunil ji for his help. Thanks are due to Sohan ji, Mohan ji, Kuldeep ji and Ranjeet ji for waiting till late nights for dropping us safely to our hostels.

I am privileged to have the company of my lovely juniors and trainees, Neeraj (gogo), Rashmi (for delicious momos and her interesting talks), Shefali, Mannu, Esha, Piya, Tiya, Swati, Sushmita, Pragati (nightingale), TR, Harmeet Kaur (Bus mate), Richa (for her beauty tips), Shubendhu, Meenakshi (Pagli), Aparna and Challa (for bringing sweets weekly, he has some occasion to celebrate every week).

It is a pleasure to thank all my B.Sc and M.Sc friends specially Samira (my confidant), Shivani (source of journal articles), Minakshi, Parul, Garima, Pratibha, Namita, and Ritu for sharing various thoughts. I am thankful to Gopal (Daddu) for his special and constructive advices during exams, unlimited entertainment during excursions and unconditional support all the time. I am
indebted to him more than he knows. Many thanks go in particular to Hemant. His truly scientist intuition has made him as a constant oasis of ideas and passions in science which exceptionally inspire and enrich my growth as a researcher. I gratefully acknowledge my steadfast friend Satish for his interesting discussions about life, science and society we had in NII and JNU. Special mention to his cooking skills, u r superb dude!!

My thanks are also due to my PhD batchmates, Prasad aka Big B, Sumit (for tolerating "Dada" for whole five years), Saurabh (for his smart and witty jokes), Susheel (for teaching me the 'western' and not to forget, the infamous 'southern' techniques), Vinay (for his very own brand of humorous comments), Prabhakar (for teaching me to drive bike), Kundan (aain..) and Deepti. I had a great time with you people while celebrating birthdays in BD-4E, Mejbaan, Punjabi by Nature and many more moments to cherish throughout my life. Thanks chaps, wish you all a very happy life.

Beyond science (which was sometimes exhaustive and disappointing), Divya has been a great stress buster for all these years. Words fell short to describe her and if I start writing, I won't be able to write the rest of my thesis. She is full of creativity, happiness and a true friend. Thanks to her amazingly "amusing facts of life" which always entertained and in fact enlightened me and blown away my stress, if any. The moments we spent together while shopping, eating, roaming and specially chatting will always be remembered fondly. I really feel blessed to have you around and you made my hostel stay so memorable.

Families are like fudge - mostly sweet with a few nuts. Words fail me to express my deep and humble gratitude towards my parents for their love, inseparable support, prayers and confidence in me. My father's motivation and support in the first place is responsible for my higher studies and research pursuits. My mother's gentle care and tender love always take load of my shoulder. I will remain indebted for everything she did for sincerely raising me. I wish I could do something for them. I am extremely thankful to my brother who is my support system, my backbone and strength. Again, my poor vocabulary is restricting me to explain how lucky I feel to be his sister. I am fortunate to have a caring and considerate sister with whom I shared not only my beautiful childhood (with lots of fights and cryings) but also her beautiful dresses. My thanks are due to my Jiju and his family for their love and for organising some memorable trips.

Finally I would like to thank everybody who directly or indirectly contributed to the successful realization of this thesis. I express my apology for not mentioning them by name.

I acknowledge CSIR, Govt of India for the financial support.

Above all I thank the almighty.

Monika Jaggi
