ACKNOWLEDGMENT

I would like to express my sincere gratitude and deep appreciation to my principle supervisor, Dr Vishvesh Badheka for his generous support, encouragement and leading me through this research work. His enthusiasm and strong interest on research have made a deep impression on me. Dr Abhishek Kumar (secondary supervisor) is gratefully acknowledged for his valuable discussions.

I want to extend my gratitude to Prof Surendra Kachhwaha, Head of Mechanical Engineering Department and Dr H B Raghvendra, Director, School of Technology for their continuous support. Furthermore, I express my gratitude to Dr Indrajit Mukhopadhyay and his team members Nisarg, Dharini, and Priyanka for providing valuable support and guidelines to conduct SEM. I am thankful to PDPU for providing excellent research environment and financial grant for paper presentations in the international conferences.

I wish to thank the RESPOND project (ISRO/RES/4/567/09-10) of ISRO for the machine facilities under this project. Dr Rajendra Kumar and Atik Mistry from Institute for Plasma Research (IPR) are gratefully thanked for help on hot tensile testing. I hereby extend gratitude to Dr Nirav Jamnapara and Mr Arun Zala from Facilitation Centre for Industrial Plasma Technologies (FCIPT) Gandhinagar for their technical support.

I would also like to thank Kush Mehta, Utsav Patel, Sagar Patel, Swarg Patel, Samarth Zala, Kedar Badheka, and Dharmesh Patel for their help during experiments. I cannot forget to acknowledge Jay Vora, Kush Mehta, Harikrishna Rana, Gaurang Joshi, and Pritesh Prajapati for the technical discussions and suggestions throughout my Ph.D. tenure.

I would like to dedicate my THESIS to my parents who have taught, guided, motivated, and supported for achieving my academic goals. I can not forget to express my humble gratitude to my parents in laws for their indirect support. Additionally, I would like to recognize my sisters Dr Gayatri Patel and Ms Shital Patel for their warm wishes.
My wholehearted appreciation goes to Silky, my wife, who stood by me through this venture, for her ongoing love, understanding and patience. I am indebted to Ruhee, my lovely daughter, whose ongoing smile has accompanied me through to the completion of this thesis.

I am sincerely thankful to the respected reviewers, Prof. Shrikantha Rao and Prof. Wenya Li, for their valuable comments on the present work. I would like to extend my appreciation to both of the reviewers for strong recommendations and acceptance towards conferral of doctoral degree (Ph.D.).

Last but not the least, I am thankful to my colleagues and friends Jay Vora, Bhargav Gadhavi, Kush Mehta, Naimish Bhatt, Nirav Patel, Jaydeep Patel, Parth Prajapati, and Rakesh Chaudhri (stress reliever) for technical and other discussions with cherishing moments of publications.
