CHAPTER ONE: INTRODUCTION

1.0. Introduction 1
1.1. Research problem 1
1.2. Background and significance of the study 6
1.3. Research objectives and hypothesis 9

CHAPTER TWO: REVIEW OF LITERATURE

Section One:

2.1. Review: Diabetes Overview
   2.1.1. Definition of diabetes mellitus 11
   2.1.2. Classification of diabetes mellitus 11
   2.1.3. Aetiology of diabetes mellitus 16
   2.1.4. Clinical manifestations of diabetes mellitus 25
   2.1.5. Diagnosis of diabetes mellitus 26
2.1.6. Management of diabetes mellitus
2.1.7. Complications of diabetes mellitus

Section Two:
2.2. Diabetes Self-Management Education
   2.2.1. Benefits of Diabetes Self-Management Education
   2.2.2. Components of Diabetes Self-Management Education
   2.2.3. Implementing Diabetes Self-Management Education

CHAPTER THREE: SUBJECTS AND METHODS
3.1. Setting
3.2. Study
3.3. Subjects and eligibility criteria
3.4. Data collection instrument and techniques
3.5. Data processing and analysis

CHAPTER FOUR: RESULTS
4.0. Results
4.1. Demographic characteristics
4.2. Comparison of intervention and control groups
   4.2.1. Pre-diabetes education
      4.2.1.1. Knowledge about diabetes and its management
      4.2.1.2. Fasting blood glucose values
      4.2.1.3. 2-hours post-prandial blood glucose values
      4.2.1.4. Body mass index values
4.2.2. Post-diabetes education

4.2.2.1. Knowledge about diabetes and its management

4.2.2.2. Fasting blood glucose values

4.2.2.3. 2-hours post-prandial blood glucose values

4.2.2.4. Body mass index values

4.3. Effect of demographic characteristics and diabetes history on knowledge

CHAPTER FIVE: DISCUSSION

5.0. Discussion

5.1. Conclusions and implications

5.2. Recommendations
