ACKNOWLEDGEMENT

I place on record my sincerest gratitude to my supervisor, Prof. (Mrs). Sushila Singhal for her guidance, constructive criticisms and provocative discussion. Her deep involvement, timely encouragement and ungrudging assistance at every stage of my work have enabled me to complete this research work. I shall forever be greatly indebted to her for the training I acquired under her supervision. I have no words to acknowledge her tireless effort in checking of the drafts despite her other scholarly preoccupations. If there is anything fallacious in my work, it is due to my immature manipulation.

I extend my feelings of indebtedness to Prof. Tapas Majumdar, Prof. S.C. Ghosh, Prof. (Mrs). Karuna Ahmad and Dr. (Mrs). Geeta B. Singh for their whole hearted support and timely assistance on many occasions. I cherish the inspiration provided by my beloved teachers Prof. A. K. Mitra and late Prof. N. Pati.

Words are inadequate to express my indebtedness to my family members for their unconditional support with enormous patience on my research work. I pay a special tribute to some of their fine dispositions. Great importance is the contributions of my little brothers and sisters whose lovely gestures always freshed me to play with my work.

I am beholden to my dears Didi Bhabhi and Arshi for their hospitality, elderly guidance, and constant encouragement; and to my nears Ramesh, Ranoo, Venkatesh and Rasmita for their
benevolent and timely suggestions, and unstinted cooperation at various stages of this work. Last moment help of Venkatesh and Ranoo is highly appreciated.

Thanks are due to the students who responded the questionnaires. Without their cooperation and help, this research work would not have seen the light of the day.

Due thanks are given to Dr. S. P. Shrivastav, Dr. Geeta Sinha, Dr. Namita Mohanty, from whom ideas were incorporated now and then. I shall be remembering the friendly encouragement of Baboo, Bishwakanta, Satish, Niti, Minati, Burnoo, and I sincerely thank to Lalit Bhai, Akshya Bhai, Monoranjan, Chandramani, Mirza, Hrudananda, Jagat, Santosh, Padu, Sebati and Pappu for their useful support.

I am also thankful to Satyendra for Assisting in computer programming and to Dr. R. K. Das and Mr. Bhupendra for typing this thesis with skill and patience.
