LIST OF TABLES

Table 3.1 Power analysis for sample adequacy: Social Competence ............................... 56
Table 3.2 Power analysis for sample adequacy: Leadership Skills ..................................... 56
Table 3.3 Outline of the intervention programme .................................................................. 61
Table 3.4 Reliability statistics for experts’ score .................................................................. 63
Table 3.5 Non-parametric test statistics results for experts’ rating ...................................... 63
Table 3.6 Reliability statistics for student’s scores ................................................................. 63
Table 3.7 Non-parametric test statistics results for students’ rating ..................................... 64
Table 3.8 Social Competence ............................................................................................... 66
Table 3.9 Concept of Leadership ......................................................................................... 69
Table 3.10 Concept of Values and their Development ........................................................... 72
Table 3.11 Planning an excursion ......................................................................................... 75
Table 4.1 Demographic composition of the sample .............................................................. 82
Table 4.2 Mean, SD, test of normality and ANOVA scores of Value preference
    based on branch of study ................................................................................................. 86
Table 4.3 Mean, SD, test of normality and t-test of Values based on gender ....................... 87
Table 4.4 Mean, SD, test of normality and ANOVA scores of Values based on
    religion ............................................................................................................................ 89
Table 4.5 Mean, SD, test of normality and t-test of Values based on their kind
    of stay .................................................................................................................................. 90
Table 4.6 Mean, SD, test of normality and t-test of Values based on Region ................. 92
Table 4.7 Mean, SD, test of normality and ANOVA scores of Social competence
    based on branch of study ................................................................................................. 93
Table 4.8 Mean, SD, test of normality and t-test of Social competence based on
    gender ................................................................................................................................. 95
Table 4.9 Mean, SD, test of normality and ANOVA scores of social competence
    based on religion ............................................................................................................. 96
Table 4.10 Mean, SD, test of normality and t-test of social competence based on kind of stay ........................................................................................................ 97

Table 4.11 Mean, SD, test of normality and t-test of Social competence based on Region ........................................................................................................ 99

Table 4.12 Mean, SD, test of normality and ANOVA scores of Leadership skills based on branch of study ........................................................................................................ 101

Table 4.13 Mean, SD, test of normality and t-test of Leadership skills based on gender .................................................................................................................. 102

Table 4.14 Mean, SD, test of normality and ANOVA scores of Leadership skills based on religion ........................................................................................................ 104

Table 4.15 Mean, SD, test of normality and t-test of Leadership skills based on their kind of stay ........................................................................................................ 106

Table 4.16 Mean, SD, test of normality and t-test of Leadership skills based on Region .................................................................................................................. 107

Table 4.17 Test of normality of the scores of Value A (religious) and B (social) based on Branch, gender, religion, stay and region ........................................ 109

Table 4.18 Test of normality of the scores of Value C (democratic) and D (aesthetic) based on Branch, gender, religion, stay and region ......................... 110

Table 4.19 Test of normality of the scores of Value E (economic) and F (knowledge) based on Branch, gender, religion, stay and region ............... 111

Table 4.20 Test of normality of the scores of Value G (hedonistic) and H (power) based on Branch, gender, religion, stay and region ....................... 112

Table 4.21 Test of normality of the scores of Value I (family prestige) and J (health) based on Branch, gender, religion, stay and region ................. 113

Table 4.22 Mean, SD, F value related to value preferences at Pre-test, Post-test and Delayed post-test phase (N = 55) ......................................................... 114

Table 4.23 pairwise comparison for Value preference with Bonferroni correction ................................................................................................ ............... 115

Table 4.24 Mean, SD, F value related to value preferences at Pre-test, Post-test and Delayed post-test phase with respect to Branch of study .......... 116

Table 4.25 pairwise comparison for Value preferences of branch 1 with Bonferroni correction ...................................................................................... 118

Table 4.26 pairwise comparison for Value F of branch 3 with Bonferroni correction ............................................................................................................. 118

Table 4.27 Mean, SD, F value related to value preferences at Pre-test, Post-test and Delayed post-test phase with respect to gender .................... 120
Table 4.28 Pairwise comparison for Value G (hedonistic) of male with Bonferroni correction ................................................................. 121

Table 4.29 Pairwise comparison for Value preferences of female with Bonferroni correction ................................................................. 122

Table 4.30 Mean, SD, F value related to value preferences at Pre-test, Post-test and Delayed post-test phase with respect to Religion ....................... 123

Table 4.31 Pairwise comparison for Value C and E of Christian with Bonferroni correction ........................................................................ 125

Table 4.32 Pairwise comparison for Value J of Hindu with Bonferroni correction ..................................................................................... 126

Table 4.33 Pairwise comparison for Value B and F of other religion with Bonferroni correction ............................................................. 126

Table 4.34 Mean, SD, F value related to value preferences at Pre-test, Post-test and Delayed post-test phase with respect to kind of stay ................... 127

Table 4.35 Pairwise comparison for Value C and F of stay 1 (Home) with Bonferroni correction ................................................................. 129

Table 4.36 Pairwise comparison for Value preferences of Stay 2 (Hostel) with Bonferroni correction ............................................................. 129

Table 4.37 Mean, SD, F value related to value preferences at Pre-test, Post-test and Delayed post-test phase with respect to region ......................... 131

Table 4.38 Pairwise comparison for Value preferences of South region with Bonferroni correction ............................................................... 132

Table 4.39 Test of normality of the scores of school and team based on Branch, gender, religion, stay and region ................................................ 133

Table 4.40 Test of normality of the scores of peer and cognition based on Branch, gender, religion, stay and region ........................................ 135

Table 4.41 Test of normality of the scores of home and emotional based on Branch, gender, religion, stay and region ...................................... 136

Table 4.42 Test of normality of the scores of forethought and flexibility based on Branch, gender, religion, stay and region ................................. 137

Table 4.43 Test of normality of the scores of social competence based on Branch, gender, religion, stay and region ........................................ 138

Table 4.44 Social competence at pre-test, posttest and delayed post-test phases 
(N = 55) ..................................................................................... 139

Table 4.45 Pairwise comparison for social competence of the whole sample 
(Z statistic *, N = 55) ...................................................................... 140
Table 4.46 Mean, SD, F value related to social competence at Pre-test, Post-test and Delayed post-test phase with respect to branch of study .................. 141
Table 4.47 Pairwise comparison for social competence of Branch 1 (Z statistic, N = 20) ................................................................. 143
Table 4.48 Pairwise comparison for social competence of Branch 2 (Z statistic, N = 15) .................................................................................................................. 144
Table 4.49 Pairwise comparison for social competence of Branch 3 (Z statistic, N = 20) .................................................................................................................. 145
Table 4.50 Mean, SD, F value related to social competence at Pre-test, Post-test and Delayed post-test phase with respect to gender ............................................................................ 146
Table 4.51 Pairwise comparison for social competence of male (Z statistic, N = 31) .................................................................................................................. 148
Table 4.52 Pairwise comparison for social competence of female (Z statistic, N = 24) .................................................................................................................. 149
Table 4.53 Mean, SD, F value related to social competence at Pre-test, Post-test and Delayed post-test phase with respect to religion .............................................................................. 150
Table 4.54 Pairwise comparison for social competence of Christian (Z statistic, N = 12) .................................................................................................................. 152
Table 4.55 Pairwise comparison for social competence of Hindu (Z statistic, N = 33) .................................................................................................................. 153
Table 4.56 Pairwise comparison for social competence of other religion (Z statistic, N=10) .................................................................................................................. 153
Table 4.57 Mean, SD, F value related to social competence at Pre-test, Post-test and Delayed post-test phase with respect to kind of stay .............................................................................. 155
Table 4.58 Pairwise comparison for social competence of Home (Z statistic, N = 10) .................................................................................................................. 156
Table 4.59 Pairwise comparison for social competence of Hostel (Z statistic, N = 45) .................................................................................................................. 157
Table 4.60 Mean, SD, F value related to social competence at Pre-test, Post-test and Delayed post-test phase with respect to Region .............................................................................. 158
Table 4.61 Pairwise comparison for social competence of North (Z statistic, N = 25) .................................................................................................................. 160
Table 4.62 Pairwise comparison for social competence of South (Z statistic, N = 30) .................................................................................................................. 160
Table 4.63 Test of normality of the scores of CBS (character building) and DMS (decision making) based on Branch, gender, religion, stay and region .............................................................................. 162
Table 4.64 Test of normality of the scores of FL (fundamentals of leadership) and GDS (group dynamics) based on Branch, gender, religion, stay and region .......................................................... 162

Table 4.65 Test of normality of the scores of PIS (planning) and PS (personal) based on Branch, gender, religion, stay and region .......................................................... 164

Table 4.66 Test of normality of the scores of PSS (problem-solving) and SCS (speech communication) based on Branch, gender, religion, stay and region .......................................................... 165

Table 4.67 Test of normality of the scores of WCS (written communication) based on Branch, gender, religion, stay and region .......................................................... 166

Table 4.68 Leadership skills at pre-test, posttest and delayed post-test phases (Complete, N = 55) ........................................................................................................... 167

Table 4.69 Pairwise comparison for leadership skills with Bonferroni correction .......................................................................................................................... 168

Table 4.70 Mean, SD, F value related to leadership skills at Pre-test, Post-test and Delayed post-test phase with respect to Branch of study ........................................................................................................... 169

Table 4.71 Pairwise comparison for leadership skills with Bonferroni correction (CSE + IT) .......................................................................................................................... 171

Table 4.72 Pairwise comparison for leadership skills with Bonferroni correction (ECE + EEE) .......................................................................................................................... 172

Table 4.73 Pairwise comparison for leadership skills with Bonferroni correction (MEC+ CIVIL) .......................................................................................................................... 172

Table 4.74 Mean, SD, F value related to leadership skills at Pre-test, Post-test and Delayed post-test phase with respect to Gender ........................................................................................................... 174

Table 4.75 Pairwise comparison for leadership skills with Bonferroni correction (Male) .......................................................................................................................... 176

Table 4.76 Pairwise comparison of leadership skills with Bonferroni correction (Female) .......................................................................................................................... 176

Table 4.77 Mean, SD, F value related to leadership skills at Pre-test, Post-test and Delayed post-test phase with respect to Religion ........................................................................................................... 178

Table 4.78 Pairwise comparison of leadership skills with Bonferroni correction (Christian) .......................................................................................................................... 180

Table 4.79 Pairwise comparison for leadership skills with Bonferroni correction (Hindu) .......................................................................................................................... 180

Table 4.80 Pairwise comparison for leadership skills with Bonferroni correction (Others) .......................................................................................................................... 181

Table 4.81 Mean, SD, F value related to leadership skills at Pre-test, Post-test and Delayed post-test phase with respect to kind of stay ........................................................................................................... 182
Table 4.82 Pairwise comparison for leadership skills with Bonferroni correction (Home)............................ 184

Table 4.83 Pairwise comparison for leadership skills with Bonferroni correction (Hostel)........................................ 185

Table 4.84 Mean, SD, F value related to value preferences at Pre-test, Post-test and Delayed post-test phase with respect to region .............................. 186

Table 4.85 Pairwise comparison for leadership skills with Bonferroni correction (North).................................................. 188

Table 4.86 Pairwise comparison for leadership skills with Bonferroni correction (South).................................................. 188

Table 4.87 Correlation between post-test and delayed post-test scores of value preferences .......................................................................................... 190

Table 4.88 Correlation between post-test and delayed post-test scores of social competence............................................................... 190

Table 4.89 Correlation between posttest and delayed post-test scores of leadership skills................................................................. 191
