ACKNOWLEDGEMENTS

The first person I should be thanking is Dr. Ramakant Shrivastava for giving me this opportunity and for pushing me to do the study in the area where the thermal engineers have a moderate problem for always makes a compromise between economy and safety in most of the thermal system by preventive Critical Heat Flux. I would not have accomplished whatever I did without his continuous encouragement, valuable supervision, timely suggestions and inspired guidance, offered by my respectful guide. His regular updates in my knowledge honed me to make a sophisticated structure of my research work.

My Sincere thanks to Dr. Kaleemuddin Syed and Dr.V.A.Kulkarni for continuous encouragement during last five years as a member of Departmental Research Committee.

I would like to extend my gratitude to the Dr.Y.A.Kawade and Prof. Munish Sharma for continuous support and encourage for the research and providing facility for my experimentation in MIT Aurangabad. I would like to extend my gratitude to the Principal Dr. P.S. Adwani for his belief and help in my research work.

I express my heart-full thanks to Dr. S.P. Bhosle and Dr. H.M.Dharmadhikari for their enthusiastic moral support for making systematic report and encouragement, Dr.A.T.Autee and Dr. N.S. Bhalkikar for their moral support in my research work and Prof. Dr. Ramphal Sharma and Dr. Anil V. Ghule from Dr. B.A.M.University, for permitting and boosting my confidence in every possible way and helping me in the preparation and characterization of nano particles.

I would not like to forget Sagar Hiswankar for helping me in the preparation and characterization of nano particles and to perform initial experiments on pool boiling. I am also grateful to Prof. Paranjape and Prof. K. T.Mahamuni helping me in the conduct of experiment, Prof. Manoj Thakur for helping me about instrumentation for my research work.

I owe my parents and family for their constant support and encouragement for my higher studies and research work.
