ACKNOWLEDGEMENT

I am very thankful and honored by the completion of my research study titled “Substance abuse leading to mental illness amongst the youth of Manipur, a social work intervention”, which has been a long cherished dream. Especially the privilege and freedom to conduct on the above mentioned subject which is a foremost and delicately intimidating issue that the state of Manipur has been facing for the past three to four decades, apart from insurgency.

I wish to thank my College, Karve Institute of Social Service, especially my guide Dr. Deepak Walokar for giving me the opportunity to study under his able guidance, rendering me the full freedom to explore during the whole span of study. I am also thankful for his dedicated involvement by coming to Manipur and witnessing procedures and places of data collection, which has made my research much more convincing and easier by breaking the barriers that could have risen throughout the data collection and its presentation. I also thank Mrs. Walokar for her encouragement on various instances. I also wish to thank all my colleagues, teaching and non teaching staff, Mrs. Hema More, Mrs. Vidya Vaidya for editing and her valuable suggestions and Librarian Mr. Mangesh Talmale of my college for their help in completion of my research work.

I deliver my sincere thanks to all the respondents, drug rehabilitation centers, halfway home for the mentally ill and the various social agencies, who rendered great support and co-operation by providing facts necessary for my study, special thanks to Social Work association, Sneha Bhavan, Shajiwa Central Jail., RIMS psychiatry department, DIC workers in Moreh, and all voluntary social workers who was involved in this study.

I am much obliged to my mother who emotionally and financially supported me throughout my study, and for understanding me and helping me live my dreams and decisions. I am also obliged to my in-laws who supported me wholeheartedly. The research would not have been successful without the help of all the people mentioned above.
I thank my husband for giving me the liberty to go forward with my research, by being on my side through thick in thin of the study. I would like to thank my family members especially my brothers for their presence when in need and their contribution and I also would like to thank my friends Marlyn and Sushil for their great support.

I wish to mention my loving son Ronin, who has been the constant catalyst in providing emotional relief throughout the study.
