ACKNOWLEDGMENT

It is great pleasure to acknowledge those who extended their support and contributed time and psychic energy for the completion of this research work.

I owe with a deep sense to my research guide Dr. Ramesh R. Manza, who directed my research work with extreme competence, and gave me many useful hints, indications, naive suggestions, constructive proofreading and many truthful discussions without which I would not have been able to accomplish this thesis work. I am certain that I will benefit from his rigorous scientific approach, and the way of critical thinking throughout my future career.

I am highly thankful to Department of Computer Science and Information Technology Dr. Babasaheb Ambedkar Marathwada University, Aurangabad for such a fruitful research environment.

I am also grateful to Dr. R. R. Deshmukh, Professor and Head, Department of Computer Science and Information Technology, Dr. Babasaheb Ambedkar Marathwada University, Aurangabad for his encouragement and administrative help time to time. His valuable and skillful guidance and suggestions improved the quality of work in all respects.

I would like to thanks to dataset providers namely ICLleaves , Intelligent computing Lab., Institute of Intelligent Machines, Chinese academy of Sciences, China and Flavia for providing me good dataset and without which my work would not have been completed.

I would like to express my deepest sense of gratitude for Honorable Shri. Balasaheb Wagh, Chairman of my institute (K. K. Wagh Institute of Engineering Education and Research, Nashik), who inspired and encouraged me with his massive words and blessings. He granted me various conveniences without which it would not have been possible to work. I am very much thankful to our principal Prof. Dr. K. N. Nandurkar, KKWIEER, Nashik who motivated me for this research and constant guidance and support.
