This thesis is the end of my journey in obtaining my Ph.D. I have not travelled in a vacuum in this journey. This thesis has been kept on track and been seen through to completion with the support and encouragement of numerous people. It is a pleasant task to express my thanks to all those who contributed in many ways to the success of this study and made it an unforgettable experience for me.

At this moment of accomplishment, first and foremost I would like to express my deepest thanks to my supervisor Dr. Devasish Chowdhury. He has been my mentor and guiding beacon throughout my Ph.D research years. His patience, encouragement and immense knowledge were key motivations, and his forensic scrutiny of my technical writing has been invaluable. He has always found the time to propose consistently excellent improvements. His perfect mix of pragmatism and exacting standards made me to learn the vital skill of disciplined critical thinking. Sir, great mentorship, approachable and good advice is your game. You gave me the confidence to “think in public”. I cannot think of a better supervisor to have and I owe a great debt of gratitude to you for everything. I can only say a proper thanks to you through my future works.

I take this opportunity to express my sincere gratitude to Prof. Pradeep Phukan, Dr. Sonit K. Gogoi and Prof. Birinchi K. Das, Department of Chemistry, Gauhati University for their valuable comments and patience in reviewing the growth of my research work at all times. A special thanks to Prof. Heremba Bailung, Head of Physical Sciences Divison, IASST, Guwahati for his valuable suggestions and untried helps for my personal and academic development. Thanks for keeping me at least slightly sane whilst figuring things out. I would like to express my heartfelt gratitude to Dr. Gitanjali Majumdar, Assistant Professor, Assam Engineering College (AEC), Guwahati for providing encouraging ideas and constructive feedbacks. It is my pleasure to acknowledge Dr. Neelotpal Sensarma, Associate Professor (II), IASST, Guwahati for his constant moral support and advice. I would also like to acknowledge our collaborators; Dr. Rajeev Shakuja, Assistant Professor and Devesh S. Agrawal, Department of Chemistry, BITS Pilani, Rajasthan for helping me to extend the scope of the thesis work.
I would like to extend my sincere gratitude to Council of Scientific and Industrial Research (CSIR), India for the project fellowship (Project No. 01(2488)/11/EMR-II) and Institute of Advanced Study in Science and Technology (IASST), Guwahati for the generous funding and providing a rich and fertile environment to study and explore new ideas. From IASST, I am grateful to all the academic and administrative staff for advice and practical support throughout my Ph.D.

I am indebted to all my friends with special mention to Material Nanochemistry Laboratory members (Upama Baruah, Achyut Konwar, Manash Jyoti Deka and Sristi Majumdar) and Polymer Laboratory members (Bedanta Gogoi, Niloy Paul, Priyanka Dutta, Sudesna Chakravarty, Bandita Kalita, Anna Gogoi) for providing a stimulating and funfilled working environment. I would also like to thank Amreen Ara Hussain, Dilip Saikia and many others who have accompanied me on different parts of the journey. My childhood friends; Deepak Kumar and Bhaskar Hazarika have helped me stay sane through my difficult years. Their support and care helped me overcome setbacks and stay focused on my research work. I greatly value their friendship and I deeply appreciate their belief in me.

Most importantly, none of this would have been possible without the love and patience of my family. My immediate family to whom this thesis is dedicated to, has been a constant source of love, concern, support and strength all these years. I would like to express my heart-felt gratitude to my family. My extended family has aided and encouraged me throughout this endeavour. I have to give a special mention for the support given by Anupam Konwar (Jijz), Vikash Jyoti Kalita (Bhaiya) and Nibedita Debbarma (Bhabi). I warmly appreciate the generosity and understanding of my extended family.

On a more personal note, I would like to pay high regards to my Papa and my Mommy for their sincere encouragement, inspiration and patience throughout my research work and lifting me uphill this phase of life. You made me into who I am. I owe everything to you!

IASST, Guwahati
