ACKNOWLEDGMENT

I owe with a deep sense to my research guide Dr. Ramesh R. Manza, who directed my research work with extreme competence, and gave me many useful hints, indications, naive suggestions, constructive proofreading and many truthful discussions without which I would not have been able to accomplish this thesis work. I am certain that I will benefit from his rigorous scientific approach, and the way of critical thinking throughout my future career.

I am highly thankful to Department of Computer Science and Information Technology Dr. Babasaheb Ambedkar Marathwada University, Aurangabad for such a fruitful research environment. I am thankful to University Grant Commission (UGC) for providing us a financial support for the Major Research Project entitled “Development of Color Image Segmentation and Filtering Techniques for Early Detection of Diabetic Retinopathy” F. No.: 41 – 651/2012 (SR). Also thankful to DST for providing us a financial support for the major research project entitled “Development of multi resolution analysis techniques for early detection of non-proliferative diabetic retinopathy without using angiography” F.No. SERB/F/2294/2013-14. Also thankful to UGC for BSR SAP Fellowship.
