46. Lin C, Lindheiber MD, River EA and Lonard A II : 

47. Lindheimer MD, Katz AL : Sodium and diuretics in 

48. Lope Z, Llera H, Hernandez Horte JL and Huttich F : 
   Retarded fetal growth in eclampsia. J Reprod. Med, 
   9 : 229; 1972.

49. Low JA, Gallbraith RS, Muir R, Killen H, Karchmar J : 
   Intrauterine growth retardation : A preliminary 
   report of long term morbidity. Amer J Obst & Gynaec, 
   130 (5) : 534-544; 1978.

50. Low JA, Gallbraith RS, Muir R, Killen H, Peter B, 
   Karchmar J : Intrauterine growth retardation. A 
   Study of long term morbidity. Amer J Obst & Gynaec, 
   142 (6) : 1, 670-77; 1982.

51. Lubchenco LO, Hansman G and Boyd E : Intrauterine 
   growth in length and head circumference as estimated 
   from live birth at gestational ages from 26-42 weeks. 
   Paediatrics, 37 : 403; 1960.

52. Macbay Rachel B : Observations on the oxygenation of 
   the foetus in normal and abnormal pregnancy. J Obst 
   and Gynaec Brit Empire, 64 : 185-197; 1951.

53. MacGillivray I : Some observation on the incidence 
   of pre-eclampsia : J Obstet & Gynaecol Brit Empire, 
   65 : 536-539; 1958.

54. Marks John, Gairdner Douglas, Rascal D Janet : Blood 
   formation in infancy - cord blood. Arch Dis Childhood, 
   32 (91) : 117-120; 1954.

55. Mc Allister CB : Placental transfer and neonatal 
   effects of diazepam when administered to women just 

64. Niels CW, Nielson: Influence of pre-eclampsia upon coagulation and fibrinolysis.

APPENDIX

WORKING PROFORMA

HAEMATOLOGICAL AND PHYSICAL GROWTH EFFECTS OF TOXAEMIA OF PREGNANCY ON NEWBORN

Case No.

MRD No. __________ Dated:

Mother's Name: 

Age: 

Baby Name: 

Age: 

Address: 

Socio-Economic Status:

BRIEF OBSTETRICAL HISTORY OF MOTHER

- Gravida/Parity/Abortion

- H/o oedema, proptosis, hypertension Yes/No
  Headache, convulsion in previous pregnancies

- P/I: Pregnancy induced hypertension Yes/No

- P/I: Preterm baby/IUGR Yes/No

ANTENATAL HISTORY

- At which trimester S/S appear:

- H/o drug administration

- H/o any high grade fever during pregnancy

NATURAL HISTORY

- Presentation

- Mode of delivery: Vaginal/Forceps/Caesarian

EXAMINATION

GENERAL EXAMINATION OF MOTHER

Oedema

Anemia

Convulsion

Lymph Node

B.F.

SYSTEMIC EXAMINATION OF MOTHER

Cardiovascular examination
Respiratory Examination

C.N.S. Examination

EXAMINATION OF NEWBORN

Anthropometric Examination

Weight
Length
Head circumference
Chest circumference

General Examination

General Condition

Oedema
Hydration
Any purpuric rash over skin
Any respiratory problem
Any congenital anomaly

Systemic Examination of Newborn

Cardiovascular Examination

Respiratory Examination

Abdominal Examination

Liver
Spleen
Any other
Neurological Examination

Neonatal reflexes:
- Rooting reflexes
- Sucking reflex
- Moro's reflex
- Any abnormal reflex

Gestational age in

By Neurological and Morphological examination
\[ \text{Score} = 0.2642 \times \text{Gestational age} + 24.595 \]

By L.M.P. : 
By Fundal Height:

Weight for that gestational age:

Investigation of Newborn's cord blood
- Total Hb %
- Total Leucocyte count:
- Total platelet count

APGAR Score : At 1 mo
At 5 mo :

Haematological values of already diagnosed and Investigated Toxaemic mother

Hb% 

T.L.C. :

DLC : P %, L %, E %, M %, B %

Blood sugar mg%, Blood urea : mg%

Serum creatinine :

Proteinuria :

Placental Examination

Weight of Placentae

Morphological Examination:

Retroplacental clot/Infarction/Any other.
