ACKNOWLEDGMENTS

I am deeply indebted to Professor K.C. Malhotra, Ph.D, FASc, FNA, my supervisor, for his incessant encouragement throughout the course of this work, and for providing guidance in giving shape of this work in the form of thesis.

I am extremely grateful to Dr. R. K. Bhattacarya, Director, Anthropological Survey of India and Shri T N Pandit and Dr M K Raha the then Regional Officer of Andaman and Nicobar Regional Centre, for providing me all the facilities for conducting this work.

In the field, I received extensive help, cooperation and guidance from the authorities of Andaman and Nicobar Administration, particularly from Dr. Ashok Kumar Panday, Senior Social Executive and Dr. Jayram, Medical Officer-in-Charge at Dugong Creek Health Centre, without their active cooperation this work would never have been completed. I deeply appreciate all the help and cooperation extended to me.

I also thankfully acknowledge the helps received from Dr. S. Kumar and Dr. P.C Coomar of Anthropological Survey of India at various stages of the field work, and Dr B M Reddy of India Statistical Institute for going through parts of the manuscript.

Grateful acknowledgments are due to Prof A.K. Ghosh, Prof. D P Mukheirjee, Prof A.R Banerjee. Prof P. Ganguly and Dr J.K Sarkar and Prof. S. B. Roy for their valuable comments and suggestions of this works.

I am virtually indebted to the Onge of Little Andaman, particularly Mr. Tambole, Mr. Nabykutty, and Mr. Totanage, who have patiently provided the data at different stages.

Thanks are also due to Dr. P.K Guha for drawing the diagrams, Shri Asok Sarkar for photographs, Shri Susanta Bera for statistical computation of the data, and Shri Indranil Bhattacharya and Shri Susanta Pal for technical assistance during the final production of this thesis.

Biswanath Sarkar
