ACKNOWLEDGEMENT

Truly unbounded thanks are due to the author’s supervisor, Dr. G. M. Samuel Knight, Professor of Civil Engineering and her joint supervisor, Dr. N. Lakshmanan, Project Advisor and former Director, CSIR-Structural Engineering Research Centre (CSIR-SERC) for their valuable guidance, advice, constant support and encouragement, without which this thesis would not have materialised.

The author profusely thank Dr. N. Lakshmanan, former Director and Dr. Nagesh R. Iyer, Director, CSIR – SERC, for sponsoring the author and for their constant support and encouragement. The author sincerely thank the Doctoral Committee members, Dr. K. Nagamani, Professor, Anna University and Dr. S. R. Satish Kumar, Professor, Indian Institute of Technology for their critical evaluation and encouragement.

The author particularly wishes to express her gratitude and thanks to Dr. J. Rajasankar for his suggestions and constant support. The author wishes to thank the co-operation rendered by Shri. Amar Prakash, Smt. Chitra Sankaran, and other members of Shock and Vibration Group, Advanced Material Laboratory, Fatigue and Fracture Research Laboratory, of CSIR-SERC. The author takes this opportunity to extend her thanks to her friends for their moral support.

The author could not have completed her work without the patience, kindness and moral support from her husband, Shri. RM. Narayanan, her parents Shri. S. Palaniappan and Smt. PL. Saraswathi and her mother-in-law Smt. RM. Lakshmi.
