Les uns diront que tout invente et que ce n'est pas
la vraie doctrine, les autres que je n'ai dit que ce que
tout le monde savait (Antole France: Rotisseire de la Reine
Pedauque).

There are some who will say that I have made up
everything and that this is not the true doctrine, there
are others who will say that I have said nothing more than
what everyone already knows.
ACKNOWLEDGEMENT

The investigations incorporated in the thesis were carried out under the supervision of Major Satyen Basu, M.B., D.M.R.(Lond), Professor and Head of the Department of Radiology, National Medical College and Hospital, Calcutta and I am deeply indebted to him for his guidance.

I am also grateful to Dr. M.N. Sarkar, Superintendent, National Medical College and Hospital and Dr. K.N. Bagchi, M.Sc., M.B., Ph.D., F.N.I., Principal, National Medical College, for their keen interest in this work and unrestricted facilities on which the work largely depended.

I am also thankful for valuable advice and kind help, to Dr. S. Ghosh, M.B.B.S., D.T.M., D.Bact., D.Phil., Professor of Leprology, Dr. A.M. Mukherjee, M.C., D.C.P., D.Phil., Professor of Pathology and Dr. K.P. Khan, M.B.B.S., D.T.M., D.C.P., D.Path, Assistant Professor of Pathology, Dr. A.K. Bhattacharyya, M.D., D.Phil., Reader, Nutrition and Metabolic Diseases Unit, Dr. S. Khanra, M.D. and Dr. A. Dutta Chaudhuri, M.B.B.S., D.Phil., House Physicians, School of Tropical Medicine, Calcutta and the staff of the Fremananda Leprosy Clinic, Calcutta. Lastly but not the least I can not but express my heartfelt gratitude to Prof. Satyabrata Bose, M.B., D.M.R.D.(Lond), Professor and Head of the Department of Diagnostic Radiology, Medical College Hospital, Calcutta, for his encouragement in taking up this work.
RADIOLOGICAL STUDY IN LEPROSY
