ACKNOWLEDGEMENTS

The author wishes to record his deepest sense of gratitude to Prof. S.N. Sen of the Department of Geology, Calcutta University under whose guidance this thesis work was carried out. He is grateful to the Director General, Geological Survey of India for giving him the necessary permission to continue the work and also for extending several facilities.

The author also likes to record his sincere thanks to his colleagues and friends in the Geological Survey of India and Calcutta University, particularly to Dr. (Mrs.) B. Das, Miss R. Bal, Dr. A.N. Sarkar and Dr. A. Mitra, for their encouragement and frequent assistance. The assistance rendered by the people of Bhilwara, Rajasthan while carrying out the field work is also gratefully acknowledged.

The author enjoyed financial assistance from the University Grants Commission and the Council of Scientific and Industrial Research in the years 1968-69 when he carried out part of the work as a Research Scholar in the Department of Geology, Calcutta University.
