

C O N T E N T S

	Page
Preface ..	i
Acknowledgement ..	iii
Chapter 1 A general introduction on the various aspects of phase transformation in solid state	1- 26
Scope of the present work ..	27- 38
Chapter 2 Thermal and dielectric properties of hydrated and anhydrous rare earth iodates ..	39- 86
Chapter 3 Thermal and dielectric properties of cadmium(II), barium(II) and lead(II) perrhenates ..	87-101
Chapter 4 Electron transport and magnetic properties of some mixed-valence alkali thiocuprates ..	102-132
Chapter 5 Phase transitions in some Cu ⁺ ion conducting solid electrolytes ..	133-157
Chapter 6 Differential scanning calorimetric studies of several compounds showing order-disorder transition ..	158-179
Chapter 7 Physico-chemical studies of a formally nickel(IV) compound KNiIO ₆ ·0.5H ₂ O ..	180-190
Appendix List of publications
