List of tables

3.1 Age-sex structure of the families of amputees 33
3.2 House-hold size of the amputees, comparison with State and National level data 34
3.3 Marital status of the amputees and distribution on age 35
3.4 Educational status of the amputees and the level of education 35
3.5 Economic category of households of the amputees on the basis of monthly par capita expenditure and comparisons with State and National data 36
3.6 Occupational pursuits of the amputees 37
3.7 Frequency of occurrence of common ailment-symptoms among the amputees 38
3.8 The reasons for amputation of the studied amputees 39
4.1 Descriptive statistics of age and anthropometric traits of normal controls and amputees (t-values depicts the results of 'Paired t-test') 41
4.2 Descriptive statistics of age and anthropometric traits of above knee and below knee amputees 42
4.3 Descriptive statistics of age and anthropometric traits of normal controls and above knee amputees 43
4.4 Descriptive statistics of age and anthropometric traits of normal controls and below knee amputees 44
4.5 Descriptive statistics of age and anthropometric traits between/among socio-economic groups of amputees 45
4.5A Comparisons of age and anthropometric traits between/ among socio-economic groups 46
4.6 Descriptive statistics of age and anthropometric traits between/ among prosthesis users 47
4.6A Comparisons of age and anthropometric traits between / among prosthesis users 48
4.7 Descriptive statistics of cardiorespiratory traits of normal controls and amputees 49
4.8 Descriptive statistics of cardiorespiratory traits of above knee and below knee amputees 50
4.9 Descriptive statistics of cardiorespiratory traits of normal controls and above knee amputees 50

</table>
5.6 Descriptive statistics of scores of Beck Depression Inventory between/among prosthesis users
5.6A Comparisons of scores of Beck Depression Inventory among/between prosthesis users using 'Sheffe test'
5.7 Classification of depression level of normal controls and amputees
5.8 Reason for mental problem of the amputees
6.1 Frequency of amputees in terms of degree of social discomfort
6.2 Social discomfort of above knee and below knee amputees
6.3 Social discomfort between/among socio-economic groups of the amputees
6.4 Social discomfort of prosthesis users
6.5 Perceived problems of the amputees in their social interaction
7.1 Descriptive statistics of anthropometric traits of different age groups of amputees
7.1A Comparisons of some anthropometric traits between/among age groups of amputees
7.2 Descriptive statistics of cardiorespiratory traits of different age groups of amputees
7.2A Comparisons of some cardiorespiratory traits between/among age groups of amputees
7.3 Descriptive statistics of haematological traits of different age groups of amputees
7.3A Comparisons of some haematological traits between/among age groups of amputees
7.4 Descriptive statistics of scores of Beck Depression Inventory of different age groups of amputees
7.4A Comparisons of scores of Beck Depression Inventory between/among age groups of amputees
7.5 Distribution of the social discomfort in different age groups of the amputees
7.6 Descriptive statistics of age and anthropometric traits of the low and high calorie intake groups of amputees
7.7 Descriptive statistics of cardiorespiratory traits of the low and high calorie intake groups of amputees
7.8 Descriptive statistics of haematological traits of the low and high calorie intake groups of amputees
7.9 Descriptive statistics of scores of Beck Depression Inventory of low and high calorie intake groups of amputees

7.10 Distribution of the social discomfort of low and high calorie intake groups of amputees

7.11 Descriptive statistics of age and anthropometric traits of amputees on the basis of duration of disability

7.12 Descriptive statistics of cardiorespiratory traits of amputees on the basis of duration of disability

7.13 Descriptive statistics of haematological traits of amputees on the basis of duration of disability

7.14 Descriptive statistics of scores of Beck Depression Inventory of amputees on the basis of duration of disability

7.15 Distribution of the social discomfort of amputees on the basis of duration of disability

8.1 The sources of information regarding prosthesis of the amputees

8.2 Waiting time for getting first prosthesis of the amputees

8.3 Support received by the amputees from welfare organizations

8.4 Distribution of the amputees on the basis of the number of prosthesis use

8.5 Causes of dissatisfaction of the amputees regarding prosthesis

8.6 The frequency distribution of amputees in terms of personal independence (measured by 'Locomotor Index')

8.7 The distribution of the amputees according to the change in the household work before and after amputation

8.8 Individuals considered helpful by the amputees in social rehabilitation

8.9 Self perception of feeling burden in the family by the amputees

8.10 The frequency distribution of amputees according to the change in occupation after the amputation
