

### ACKNOWLEDGEMENT

The thesis entitled 'Studies on the mode of action of mycobacillin, a polypeptide antibiotic, on *Leishmania donovani*' submitted for the degree of Doctor of Philosophy (Science) of the University of Calcutta was carried out at the Biochemistry division of the Department of Pharmacy, Jadavpur University.

I express my sincere gratitude to Dr. A.N. Bhaduri, Reader, Department of Pharmacy, Jadavpur University, without whose constant help and guidance it would not have been possible for me to carry out the investigation upto this level.

I am also indebted to Dr. D.K. Roy, Professor and Head of the Department of Pharmacy, Jadavpur University for his keen interest in this work and permitting me to utilize the facilities available in this department.

I express my deep sense of gratitude to my friend, Dr. D.K. Ghose of the Indian Institute of Experimental Medicine, Calcutta, who acted as a continuous source of inspiration to me all through this work.

I am also indebted to Dr. S.K. Bose, Professor, Department of Biochemistry, Calcutta University, Dr. S.K. Majumder, Professor, Department of Food Technology and Biochemical Engineering, Jadavpur University and Dr. A.G. Dutta of the Indian Institute of Experimental Medicine, Calcutta, and

Dr. A.B. Banerjee of the department of Biochemistry,  
Calcutta University for their valuable help and sugges-  
tions during this work.

I also wish to thank Sri P.C. Banerjee of the Indian  
Institute of Experimental Medicine, Dr. D.K. Pal, Mr. S.  
Ghatak, Mrs. R. Mookherjee, Mrs. M. Chanda and Mrs. M. Roy  
for their kind help in various ways.

Department of Pharmacy  
Jadavpur University  
Calcutta-700032  
August, 1975.
