List of Figures

Fig. 1. Mechanism of penile erection.
Fig. 2. Chemical structure of Jatamansone
Fig. 3. Chemical structure of Jatamanshic acid
Fig. 4. Chemical structure of β Maaliene
Fig. 5. Chemical structure of Angelicin
Fig. 6. Chemical structure of Valeranone
Fig. 7. Chemical structure of Vardol
Fig. 8. Chemical structure of Virolin
Fig. 9. Jatamansi (Nardostachys jatamansi DC)
Fig. 10. Chemical structure of bacoside A₁
Fig. 11. Chemical structure of bacoside A₃
Fig. 12. Brahmi (Bacopa monnieri Linn.)
Fig. 13. Showing the different age groups of patients having Spermatorrhea, out of 56 selected patients.
Fig. 14. Showing the percentage of patients with different religion having spermatorrhea.
Fig. 15. Showing the different type of occupations having spermatorrhea.
Fig. 16. Showing the income groups of patients (%) having spermatorrhea.
Fig. 17. Showing the pattern of habitat of 56 patients suffering from Spermatorrhea.
Fig. 18. Showing the diet habit of 56 patients of Spermatorrhea.
Fig. 19. Showing the Prakriti of 56 patients having Spermatorrhea.
Fig. 20. Showing the symptoms present before treatment
Fig 21. Showing the relief of symptoms of treatment group A before and after treatment with Jatamansi powder.
Fig. 22. The bar diagram shows the percentage of relief of three symptoms treated with Brahmi powder.

Fig. 23. The bar diagram shows the percentage of relief of three symptoms treated with the mixture of Jatamansi and Brahmi powder

Fig. 24. Showing the effect of Jatamansi powder over different laboratory investigations of treatment Group A.

Fig. 25. Showing the effect of Brahmi powder over different laboratory investigations of treatment Group-B.

Fig. 26. Showing the effect of the mixture of Jatamansi and Brahmi powder over different laboratory investigations of treatment Group-C.

Fig. 27. Showing the effect of rice powder (Placebo) over different laboratory investigations of treatment Group-D.

Fig. 28. Showing the Proportion of success of treatment on Group A, B, C and D having symptoms.

Fig. 29. Showing the results from objective parameters of treatment Group A, B, C and D.
