ACKNOWLEDGEMENTS

My greatest debt is to my research supervisor, Dr. H S Chopra, Associate Professor, and Head, West European Studies Division, School of International Studies, Jawaharlal Nehru University, New Delhi, without whose enthusiasm, encouragement and understanding, I could not have completed this project.

I want to acknowledge especially the help and encouragement I have received from Dr. K B Lall, former Ambassador to the EEC, and Chairman, Indian Council for Research into International Economic Relations.

For helpful comments on preliminary drafts, a special debt of gratitude is due to Dr. M Francini, my research co-ordinator at the Commission of the European Communities, Brussels.

Several others spared their valuable time to comment on various aspects of the work, notably Dr. P Hanson, Reader in Soviet Economics, Centre for Russian and East European Studies, The University of Birmingham; Keith Pavitt, Senior Fellow, Science Policy Research Unit, The University of Sussex; Charles Cooper, SPRU, Sussex; Bruna Teso, Science Policy Division, OECD, Paris; Dr. Russell Moseley, Technology Policy Unit, The University of Aston in Birmingham, UK; Dr. S J Patel, Director, Technology Transfer Division, UNCTAD.
Geneva; Umberto Colombo, Comitato Nazionale per l' Energia Nucleare, Rome; Nathaniel H Leff, Graduate School of Business, Columbia University in the City of New York; Professor Peter Katzenstein, Department of Government, Cornell University; New York; Dieter Ernst, University of Hamburg; Philip Gummett, Department of Liberal Studies in Science, University of Manchester; Nathan Rosenberg, Department of Economics, Stanford University; Hans Gunter, Chief, Bureau of Multinational Enterprises, ILO, Geneva; Dr Ashok V Desai, Consultant, National Council for Applied Economic Research, New Delhi and Jairam Ramesh, Consultant, Energy Advisory Board, Ministry of Home Affairs, New Delhi.

I would also like to thank Jawaharlal Nehru University and Commission of the European Communities for providing research grants and travel fellowships which enabled me to carry out field work in 1981.

Lastly this thesis could not have been written without the stimulus of discussion with my friends like Mohun Kudaysia, K. Ramakrishna, Kunal Chakrabarti, Ashim Pati, Gaur Chaudhury, R. Jayaraman, Moazzam Ali, and Amit Bannerjee and Arvind Kumar. I am also grateful to Purnendu Kavoori and Shubhra Chakrabarti for their valuable support during a trying phase of my life.
However my greatest debt is to two of my close friends P K Basant and Mrs. Jacqueline Lastenouse, without whose logistical support I could not have completed this work.

I would also like to thank Mr B L Pawhwa and Mr. Chand Narain Sharma for excellent typing of this thesis.
