CONTENTS

CHAPTER 1
INTRODUCTION

1.1 Sample Surveys 1
1.2 Census 3
1.3 Sampling v/s Census 4
1.4 Advantages of the Sampling over Census 5
1.5 Sampling with & without Replacement 6
1.6 Various Sampling Designs 7
1.7 Stratified Random Sampling 11
1.8 Problems in Stratified Sampling 14
1.9 A Quadratic Cost Function 22
1.10 Problem of Non-Response 22
1.11 Application of Mathematical Programming Techniques in Sample Surveys 25
1.12 Goal Programming Approach 27
1.13 The Optimization Software LINGO 28

CHAPTER 2
MULTIVARIATE STRATIFIED SAMPLING: THE COMPROMISE ALLOCATION

2.1 Introduction 31
2.2 Compromise Allocation 33
CHAPTER 3

OPTIMUM MULTIVARIATE STRATIFIED SAMPLING DESIGN WITH TRAVEL COST: A MULTIOBJECTIVE INTEGER NONLINEAR PROGRAMMING APPROACH

3.1 Introduction 73
3.2 Notations 76
3.3 Formulation of the Problem 78
3.4 Optimization Methods for Solving Multiobjective Programming Problem 80
3.5 A Numerical Illustration 87
CHAPTER 4
MULTIVARIATE OPTIMUM ALLOCATION WITH PROBABILISTIC NON-LINEAR COST CONSTRAINT 97

4.1 Introduction 97
4.2 Problem Formulation 100
4.3 Solution using Chance Constrained Programming 103
4.4 A Numerical Illustration 107
4.5 Discussion 110
4.6 Conclusion 117

CHAPTER 5
RANDOMIZED RESPONSE TECHNIQUE IN STRATIFIED SAMPLING 119

5.1 Introduction 119
5.2 Two-Stage Randomized Response Model for Univariate Stratified Sampling 125
5.3 Two-Stage Randomized Response Model for Univariate Stratified Sampling when the Travel Cost is Significant 136
5.4 The Multivariate Case 139
5.5 Conclusion 153
