Chapter 1: Characters of Urban Transport Problems in Less Developed Countries

1.1 Introduction 1
1.2 Problems of Poverty and unequal income distribution 2
1.3 High rate of population growth-impacts on Urban Population 3
1.4 Low degree of urbanization and lack of communication Infrastructure 6
1.5 Car concentrations in Cities 8
1.6 High Dependence on Public Transport 10
1.7 Deficiency of conventional public transport services 12
1.8 Private ownership in Public Transport Market 15
1.9 Intermediate Public Transport modes 20
1.10 Mixture of a Variety of Public transport modes 22
1.11 High Rates of Accidents 26
1.12 Energy, Employment and others 29

Chapter 2: Conventional Transport Planning Models and Their Relevances in the Less Developed Countries

2.1 Introduction 42
2.2 Demand Models 42
2.3 Evaluation Techniques 56
2.4 Important Observations 62
2.5 Conclusion 64

Chapter 3: Public Transport Compositions and Short-Run Improvements

3.0 Introduction 65
3.1 Transport Planning vs Problem Solving 65
3.1.1 Examples of areas where problem solving process may be adapted in case of LDCs 67
3.2 Scope of Present Research 68
3.3 Description of the Problem 70
3.3.1 Problem Definition 74
3.3.2 Problem Domain 75
3.3.3 Objectives 76
3.3.4 Constraints on Objectives 77
3.4 Components of Composition Model 79
3.4.1 Demand and Supply 79
3.4.2 Performance Levels of Public Transport 81
3.4.2.1 Service Characteristics 83
3.4.2.2 Operating Characteristics 86
3.4.2.3 Social Characteristics 88
Chapter 4: Description of The Study Area

4.0 Case of Calcutta City

4.1 Introduction

4.2 Land use

4.3 Population

4.4 Transit volume

4.5 Supply of Transport

4.5.1 The Calcutta State Transport Corporation (CSTC)

4.5.1.1 Introduction and growth

4.5.1.2 Organisation

4.5.1.3 Vehicles

4.5.1.4 Operating staff

4.5.1.5 Operating style

4.5.1.6 Financial health

4.5.1.7 Important Observations

4.5.2 The Calcutta Tramways Company Limited (CTC)

4.5.2.1 Introduction and Growth

4.5.2.2 Organisation

4.5.2.3 Vehicles

4.5.2.4 Operating staff

4.5.2.5 Operating style

4.5.2.6 Financial Health

4.5.2.7 Major observations

4.5.3 Private Buses of Calcutta

4.5.3.1 Introduction and Growth

4.5.3.2 Vehicles

4.5.3.3 Organisation

4.5.3.4 Operating Staff

4.5.3.5 Operating Style

4.5.3.6 Financial Health

4.5.3.7 Major Observations

4.5.4 Minibuses of Calcutta

4.5.4.1 Introduction and Growth

4.5.4.2 Vehicles

4.5.4.3 Organisation

4.5.4.4 Operating Staff

4.5.4.5 Operating style

4.5.4.6 Financial Health

4.5.4.7 Major observations

4.5.4.7.1 Contribution to Public transport

4.5.4.7.2 Road Safety

4.5.4.7.3 Road space and congestion
Chapter 5: Statistical Descriptions of the Model's Components

5.0 Introduction 165
5.1 Travel Demand 165
5.1.1 Road Passenger's Demand and its
time distribution 166
5.2 Aggregate growth trends of
Public Transport Modes 169
5.3 Modal Performances-Service
Characters 170
5.3.1 Operating speed 170
5.3.2 Access Distance 171
5.3.3 Regularity and frequency 172
5.3.4 Comfort 174
5.3.5 Service Hours 175
5.3.6 Dealings of operating Staff 175
5.4 Operating Characteristics 176
5.4.1 Fleet Utilization 177
5.4.2 Kilometerage per day 178
5.4.3 Revenue Earnings 180
5.4.4 Operating Cost 182
5.5 Social characteristics 185
5.5.1 Road Accidents 185
5.5.2 Road space usage 187
5.5.3 Energy Consumption 188
5.5.4 Employment 189

Chapter 6: Travel Behaviours in Mixed Traffic Systems

6.1 Behaviours of Public Transport Mix 207
6.2 Supply of Public Transport 207
6.3 Loading Pattern 211
6.4 Estimation of Travel Parameters
from Survey Data 212
6.5 Example of a sample data set 214
6.6 Dynamic Modal Demand Model 221

Chapter 7: Public Transport Composition Model for Calcutta

7.1 Introduction 280
7.2 Basic approach 281
7.3 Nature of Demand 283
7.4 The Model 284
7.5 The detail structure of the
composition model 289
7.6 Evaluation Process 297
7.7 Results of the Experiment 302
Chapter 8: Summary and Conclusions

8.1 Introduction 307
8.2 Scope and Objective of Study 308
8.3 Study Area 311
8.4 Dynamic Modal Demand Model 315
8.5 Public Transport Composition Model 315
8.6 Solutions and findings 319
8.7 Conclusions and Important Observations 320
8.7.1 Present Decision Technology and the current study 320
8.7.2 Implementation and Feedback 322
8.7.3 Limitations and Further Scope of Research 322

Appendix: A Spread Sheet Program 325
Appendix: B References 339
