Acknowledgement

It is with profound pleasure, I express my sincere gratitude to my research guide Dr. Urmila Makhija, In-Charge Mycology group, Agharkar Research Institute, Pune, for her inspiring guidance. Her continuous encouragement and moral support throughout was of great help in completing this dissertation.

I express my indebtedness to Dr. B. C. Behera, for his instinctive guidance and keen interest during the course of this work. Through his help it became possible to undertake the bioactivity studies and experiments in tissue culture.

I am highly thankful to Dr. P. G. Patwardhan, former Head, Mycology Group, Agharkar Research Institute, Pune, for his keen interest, suggestion and encouragement.

I am grateful to Dr. V. S. P. Rao, Director, Agharkar Research Institute, Pune, for permitting me to register for this course.

I express my sincere thanks to Mrs. Archana Dube, Ms. Gayatri Chitale, for their tireless help in corrections and encouragement throughout the work. I also wish to thank Mrs. Anjali Sonone, Mr. Neeraj Verma, Mr. Padmanabsh Mishra, Mr. Prasad Rao, Mrs. Sangita Ghatwai, Mr. B. R. Kakade, Mrs. Vimal Waingankar, Sadhana for their help, and to Mr. M. R. Kulkarni and Mr. K. D. Gole for their help in maintaining the laboratory, and also many friends who helped me in various ways.

I take this opportunity to acknowledge with thanks to late Dr. Mason Hale who has given his data and photographs of types/authentic material to our laboratory without which the work wouldn't have completed in a speculated time period.
