Nothing in life is to be feared, it is only to be understood. Now is the time to understand more, so that we may fear less.” - Marie Curie

Although it is one's perseverance, power of apperception, intrepid resoluteness and hard work that foment him closer to his ambition, but I believe it is the act of consecration of our beloved ones that helps our dreams come true. Therefore, I took this opportunity to express my heartfelt gratitude to all the persons who provided me blessings, favour and support and accompanied me in the tedious scientific journey of research and completion of my thesis.

“No matter how far we come, our parents are always in us.” - Brad Meltzer

Foremost, I am indebted for all the unconditional love and support of my parents. I bestow my deepest regard and love to my father, Mr. Subhadeb Mukhopadhyay and mother, Mrs. Phullara Mukhopadhyay for inculcating in me virtues of perseverance and patience that helped me surpass all the crossroads of life with triumph. They are the first ones to introduce me to the wonderful world of science, taught me to ask questions and not to blindly follow a trend without proper reasoning. I cannot express in words the magnitude of encouragement I got from my grand parents, especially my grandfather, Late Arunendra Roychowdhury. It is unfortunate that he is not here to appreciate my work.

It would have been impossible for me to finish my work without the love, care, help, cooperation and mental support that I received from my mother-in-law, Mrs. Supriya Chowdhury, father-in-law, Mr. Keshab Lal Chowdhury and my Jethima, Mrs. Arunima Mukherjee.

“Tell me and I forget, teach me and I may remember, involve me and I learn.” - Benjamin Franklin

I bestow my deepest regard to my supervisor, Dr. Syamaal Roy who gave an absolute liberty to exchange and implement my scientific ideas. His liberal mind is perhaps the most treasured property from a scholar's perspective as it builds the fundamentals of our contemplation without hindrance. I am indebted to him for his absolute support, affection and care. He has offered me his association in other fields of life, where we have exchanged pleasantries regarding so many aspects.

My customary vote of thanks goes to the Director of JNCB, Dr. Siddhartha Roy for giving me this wonderful opportunity to work in this prestigious institute. I also express my gratitude to CSIR which has provided the scholarship for performing my research work.
I wish to venerate Dr. Tuli Biswas, my co-supervisor, who helped me with her affection and valuable suggestions during times of crisis. Dr. Hemanta K. Majumdar has contributed much with his valuable suggestions and encouragement. I would also like to thank Dr. Rabindranath Mukhopadhyay, Dr. Subrata Majumder, Dr. Sushanta Roy Chowdhury, Dr. Soma Banerjee and Dr. Mitali Chatterjee for their kind gifts of chemicals and suggestions which were extremely important for my research work.

It would remain incomplete if I do not mention the teachers from my College and University days. I truly miss and cherish those days with Dr. C Prasad, Dr. R Kundu, Dr. SSinha and Dr. SGhosh from Dept. of Botany Lady Brabourne College, University of Calcutta; Dr. CK Dasgupta, Dr. U Dasgupta, Dr. U Choudhury Dr. AS Chakraborty, Dr. S Roy Chowdhury Dr. SBanerjee Dr. S. Kundu, Dr. A Lahiri and Dr. S Mukherje from Dept. of Biophysics, Molecular Biology and Bio-Informatics, and Dr. Shampha Biswas from Saha Institute of Nuclear Physics as they are the ones who helped in a way to shape my personality with their love, care and affection.

"Love, is in all things a most wonderful teacher." - Charles Dickens

The best outcome from these past five years is finding my best friend, soul-mate, and husband. I married the best person out there for me. Mr. Sayan Chowdhury is the person who can appreciate my quirkiness and sense of humor. There are no words to convey how much I love him. Sayan has been a true and great supporter, a mentor and has unconditionally loved me during my good and bad times. He has been non-judgmental of me and instrumental in instilling confidence. He has faith in me and my intellect even when I felt like digging hole and crawling into one because I didn’t have faith in myself. These past several years have not been an easy ride, both academically and personally. I truly thank him for sticking by my side, even when I was irritable and depressed. I feel that what we both learned a lot about life and strengthened our commitment and determination to each other and to live life to the fullest.

"It is one of the blessings of old friends that you can afford to be stupid with them." - RW Emerson

Words fail me as I thank my Lab-seniors, Dr. Jayati MBasu, Dr. Arun K Halder, Dr. Subha Sen, who have all extended their support in a very special way and I gained a lot from them, through their personal and scholarly interactions, their suggestions at various points of my research programme. Although they are my seniors, Ms. Moumita Ghosh, Ms. Sanchita Datta and Mr. Koushik Roy are more like my friends, who extended their support during my times of crisis.
Among many gifts which I received from my research life, the one that I hold dear to me is the group of friends I made. Budhaditya Mukherjee, Sandip Mukherjee and Joydeep Paul are no less than my own brothers. Among all, Budhaditya tolerated all my requests to go to various other laboratories to perform my research work. Our lab appeared empty during the times when Sandip was not around. His pranks and witty comments kept us rejuvenated. I would never forget the help which Joydeep provided me whenever I needed in spite of his own adversities. Apart from their help in intellect and experiments, they are extremely enjoyable to be with. The help from Mr. Shantanabha Das during “flow-cytometry” days are highly appreciable. I doubt whether I have ever met a more obedient girl before: the newest member in our lab, Amrita Pramanik. Her calm demeanor and charming personality made us good friends. Our lab techie Mr. Suresh Kumar eventually became a very good friend of mine because of his quick wit and affable nature. I greatly value their friendship and I deeply appreciate their belief in me. It would remain incomplete if I do not mention Dr. Rajan Guha and Dr. June Ghosh as their bizarre constitution kept us entertained during our monotonous schedule.

It was always a pleasure to advise and demonstrate Science to the Graduate students Tania Mitra, Kavyashree Puranik and Aakash Mukhopadhyay, who also helped me to complete a certain portion of my dissertation. Their intellect and willingness to learn was amazing.

The help from Dr. HK Majumdar’s group, Dr. Amartya Mishra, Mr. Sourav Saha and Mr. Somnath Roychowdhury was invaluable. I would like to thank Dr. S Bhattacharya’s group, Mr. Anup Majumdar and Mr. Mainak Bose, Dr. S Bandyopadhyay’s group, Mr. Jaydeep Chaudhuri, Mr. Avik Acharya Choudhury and Mr. Anirban Manna; Dr. S Roychowdhury’s group, Dr. Sourabhra Nath and Mr. Arindam Datta for their help and support. I would like to thank Mr. Saikat Majumder (Bose Institute) for his earnest cooperation in providing me with chemicals when I needed them most. Ms. Prarthana Chakraborty requires special mention for her laudable support. I am grateful to Dr. Raka Ghosh for her exquisite ability to make my Post-grad project days delightful both academically and personally.

I also take this opportunity to thank my college friends. I was lucky to be a part of the friendly M. Sc group. Friends like Abhisekh, Sumit, Bidisha, Nilantana, Ritwika, Madhumanti and Debjit are precious to me. My sincere thanks go to all my B. Sc friends. They will remain dear to me forever.
I would like to express my gratitude towards the technical staffs without whose help this thesis would have been impossible. Mr. Kshudiram Naskar’s ingenuous way of handling animals and Dr. Anupam Banerjee’s ability to give a new dimension to the art of confocal microscopy are extremely praiseworthy. I will remember forever how Mr. Gopal Mondal’s ginger tea invigorated us during our daily tussles and toils. A special mention of Mr. Narendra Pradhan who has always been at help in times of need. I also express my sincere gratitude to the cleaning staffs and security personnel for providing us with a proper work environment.

I am thankful to all other staff members of different divisions of II CB. I thank the Library and documentation division, Accounts and bill section, Stores and purchase section, R & C section, Animal house facility, Transport section, Establishment section, Dispatch section and all other sections and divisions of II CB for their continuous help and support during my tenure.

"Beauty lay not in the thing, but in what the thing symbolized." - Thomas Hardy

Lastly, it would be unwise to ignore the immense sacrifice by the animals. They forfeited their lives for my research and for the welfare of science. I would remain indebted to them forever.

Finally, I wrap up acknowledging all my near and dear ones who have never left me divested and shared some lacuna of time and space with me, whom I am not being able to mention due to lack of space.

Thank you all

Rupkatha Mukhopadhyay

Infectious Diseases and Immunology Division
