ACKNOWLEDGEMENTS

The present thesis entitled "Speech-Audiometry: Development and Standardization of Speech Test Materials in the Bengali Language" is submitted for the Degree of "Doctor of Philosophy" in Arts (Linguistics) to the University of Calcutta by the writer of this thesis. Though such is said of the necessity of speech audiometry for assessing the hearing acuity of the deaf by using speech test materials, properly constructed in their mother-tongue, but no attempt has been made so far for preparing such materials in the Bengali Language. The present thesis is an attempt to alleviate this problem.

During the period of this research work many people of India and abroad have extended their fullest co-operation without which the successful completion of this work would have been impossible. The writer of thesis at the outset takes the opportunity to acknowledge the help and co-operation, rendered by them.

First the shower of thanks goes to Dr. Abirlal Mukherjee, the former Head of the Department of E.N.T., Calcutta Medical College & Hospital, Calcutta, and an E.N.T. Specialist of national stature, for suggesting the problem for investigation.
Now the writer of the thesis feels it his solemn duty to show his profound respect to his sage-like preceptor Acharya Sukumar Sen, renowned linguist and litterateur, whose blessings are always felt as beacon-light to him.

The writer of this thesis is extremely indebted to his teachers Mr. C.A. Powell, Director of Oxford Polytechnic, London and Miss. Dorothy M. Moralee, Teacher for the Deaf, U.K. as it was a great good fortune on the part of the present writer that he had the rare privilege of studying the subject under such outstanding scholars.

The writer of this thesis modestly pays the sincerest homage to his much esteemed teacher Dr. Subhadra Kumar Sen, Head of the Department of Linguistics, university of Calcutta, under whose able guidance and inspiring instructions it was possible for him to complete this laborious research work.

Deepest gratitude is expressed to his friend Sri Subrata Banerjee, Director, Pratibandhi Kalyan kendra, Bandel, Hooghly, for giving institutional sponsorship to conduct this research work and to Sm. Anubhuti Basu, Secretary, Parents' Own Clinic for the Deaf-Children, Calcutta, for giving him permission to administer the required tests for this work in her institution.
Thanks are due to Sri Sunirmal Banerjee, a renowned deaf-artist of India, for painting the cover-let of this thesis and also for preparing some test material pictures; and to Sri Bhaskar Lahiri, Art-Teacher, Ideal School for the Deaf, Calcutta, and to his favourite Sri Beetaan Goswami, a hearing-impaired boy, for preparing some test material pictures.

In this research work the writer has received manifold assistance and inspiration from various corners and in this respect he is enormously indebted to his friend Sri Sivapada Chakraborty, Audiometrician, Ideal School for the Deaf, Calcutta, from helping him in administering pure-tone and speech audiometric tests and in recording speech samples of normal hearing children and hearing impaired children; to Mrs. D. Adenwala, Ex-Principal, Oral School for the Deaf, Calcutta, for making him more and more interested to work in this field; to his elder sister Smt. Tripti Banerjee, Ex-Teacher, Calcutta Deaf and Dumb School, Calcutta and to his brother-in-law Sri Sunil Banerjee, Advocate, City Civil Court, Calcutta, for their constant inspiration and co-operation; to his favourite student Smt. Swati Chakraborty (Dutta), Teacher, Ideal School for the Deaf, Calcutta for her assistance many in number; to his wife Smt. Sandhya Chatterjee, his daughter Kumari Sayeri Chatterjee and his sister-in-law Smt. Krishna Mukherjee for their help and encouragement in conducting research for this thesis; to
his friends Sk. Md. Aziz-Ul-Haque, Audiologist, Sri Bibhuti Mohon Dutta and Sri Mrinal Goswami for extending their best co-operation in this work and to his fraternal friend Sri Debasish Ghosh, Speech Therapist & Audiologist, Nilratan Sircar Medical College & Hospital, Calcutta, for his valuable advice for completing this job. He is also grateful to Sri Subhas Ray Choudhury and Sri Dipak Shome for their timely and efficiently typing this job.

Last but not the least, the writer of this thesis feels it his ardent duty to express his immense gratitude to Smt. Mallika Goswami, Teacher, Calcutta Deaf & Dumb School, Calcutta, whose constant encouragement, moral support, active co-operation and valuable advice helped him to complete this thesis.
