ACKNOWLEDGEMENT

The author is deeply indebted to her supervisor Dr. R.C.PANDA, Principal Scientist, Chemical Engineering Department, Adyar, Chennai-20 for his guidance, constant encouragement and invaluable support during the research work. The author expresses her sincere thanks to Dr. Asit Baran Mandal, Director, CLRI, Chennai-20, for his support to carry out the research in CLRI.

The author expresses her sincere thanks to Dr. T.Thyagarajan, Professor, Anna University (MIT Campus), Chennai -44, for his suggestions, constant encouragement and comments. The author is thankful to Dr. Arun K.Tangirala, Associate Professor, IITM, Chennai-36, for his valuable suggestions. The author expresses her gratitude to Dr. V.S.Ramachandra Rao, Professor, IITM, Chennai-36, for his invaluable guidance in the execution and completion of the research work. Due acknowledgement is given to the Joint Managing Director, TWAD board, Tamilnadu for allowing her to carryout experiments at TWAD Desalination plant, Narippayur, Ramanathapuram(Dt), Tamilnadu.

The author is verymuch thankful to Dr. R.Shivakumar, Chairman, Easwari Engineering College, for allowing her to undertake the research work. The author is thankful to all her colleagues for their help at various stages of the research work. The author expresses her sincere thanks to the staff of CLRI who have directly or indirectly helped her during research. The author whole heartedly dedicates this thesis to the Almighty, her Parents Mrs & Mr. Janaki Subramani, her family members and her aunt Mrs.R.Indirani, who have moulded her to the present status, and for their constant motivation.
