Present study "Effect of Perceived Crowding on Adolescent's Adjustment and Mental Health in Varanasi District" is submitted for the degree of Ph.D. Which is divided in five chapter as - Introduction, Review of Literature, Research Design and Methodology, Result and Discussion, Summary & Conclusions.

There are many who have helped me a lot in this research work, and I feel highly privileged to thank all of them. First of all I am highly thankful to my supervisor, Dr. (Smt.) Raka Rathor, Reader & Head of the Department of Home Science, K.N. Govt. P.G. College, Gayanpur - Sant Ravidas Nagar Bhadohi for his most useful and meaningful suggestions right from the beginning of my study.

The honourable Principal of the college, Dr. Radhey Shyam Shukla, has been a great source of generating academic environment both within me and within the college premises; he has helped me in many other ways, too.

I am also thankful to Dr. V.D. Mishra, P.G. College, Gazipur for his valuable suggestions on the study.

The libraries, I have greatly benefitted from, and am greatly indebted to, are Banaras Hindu University and Mahatma Gandhi
Kashi Vidyapeeth, Varanasi, where I had access to some of the rare books and journals I have made use of in this work. Mention must be made of Mr. Dinesh Yadav and Upadhyaya Ji from BHU Library and Mr. Mohan Lal from Mahatma Gandhi Kashi Vidyapeeth Central library who were of special help during the course of research.

It would be really injustice if I donot thank my family members who suffered a lot during these years due to my very busy study hours. I am thankful to great Uncle (Tau ji) Mr. Dhirendra Kumar Srivastava and Aunty (Tai ji) Smt. Tara Srivastava for moral encouragement and support in every movement of crisis. My great father Shri Surendra Kumar Srivastava and my great mother Smt. Sandhya Srivastava has been a living inspiration in all my academic pursuits. Thanking may be part of convention but their help, guidance, and belief in me has made me see the better part of life in a far more judicious way. My brothers, Mr. Shashank, Abhishek and Abhijeet have contributed to the quota of help and inspiration while I was busy with the present study. My friend Bhawana Srivastava deserves a special thank for help on data collection.

Lastly, I take this opportunity to thank Mr. Devendra Kumar, who very ably and competently typed the thesis. Errors that remain are my own and stand correction in future.

Km. Jyotika Srivastava
