LIST OF FIGURES

FIG 1: Classification of Leukemia.
FIG 2: Molecular genetics of CML
FIG 3: Cyclooxygenase-2: The target for new class of NSAIDs.
FIG 4: Possible mechanisms of NSAIDs induced apoptosis.
FIG 5: Role of cyclooxygenase-2 in cancer.
FIG 6: Structure of C-PC.
FIG 7: Chemical structure of Celecoxib.
FIG 8: An overview of apoptotic signaling pathways.
FIG 9: Telomerase and cancer.
FIG 10: Telomerase activity assay- TRAP-ELISA method.
FIG 11: Effect of C-PC on cell proliferation in K562 cells (MTT Assay).
FIG 12: Effect of Celecoxib on cell proliferation in K562 cells (MTT assay).
FIG 13: Western blot analysis showing the effect of C-PC and Celecoxib on COX-1 protein expression in K562 cells.
FIG 14: Western blot analysis showing the effects of C-PC and Celecoxib on COX-2 protein expression in K562 cells.
FIG 15: Phase contrast photomicrographs showing the effect of C-PC and Celecoxib in K562 cells.
FIG 16: Fluorescence microscopic studies showing C-PC and Celecoxib induced nuclear DNA fragmentation in K562 cells stained with DAPI.
FIG 17: Scanning electron micrographs showing C-PC treated K562 cells.
FIG 18: Transmission electron micrographs of C-PC and Celecoxib treated K562 cells.
FIG 19: Agarose gel electrophoresis showing internucleosomal DNA fragmentation induced by C-PC and Celecoxib in K562 cells.
FIG 20: Quantification of apoptosis by FACS.
FIG 21: Western blot analysis showing C-PC and Celecoxib induced release of cytochrome c into the cytosol in K562 cells.
FIG 22: Western blot analysis showing release of cytochrome c into the cytosol in K562 cells treated with C-PC for different time periods.

FIG 23: Western blot analysis showing the cleavage of PARP in cell extracts of C-PC and Celecoxib treated cells.

FIG 24: Immunoblot analysis of Bcl-2 expression in K562 cells treated with C-PC and Celecoxib.

FIG 25: Immunoblot analysis of Bax expression in C-PC and Celecoxib treated K562 cells.

FIG 26: Immunoblot analysis of c-Myc expression in C-PC and Celecoxib treated K562 cells.

FIG27A: Effect of C-PC and Celecoxib on PKC activity (15 min)

FIG27B: Effect of C-PC and Celecoxib on PKC activity (30 min)

FIG 28: Elution profile of C-PC

FIG 29: Visible Scanning Spectrum of C-PC purified from *Spirulina platensis*

FIG 30: Native PAGE and SDS PAGE of C-PC

FIG 31: Western blot analysis of C-PC

FIG 32: Immunolocalization of C-PC by confocal microscopy

FIG 33: Immunolocalization of C-PC in K562 cells (Native-PAGE)

FIG 34: Effect of C-PC and Celecoxib on Hsp60 protein expression by immunoblot analysis.

FIG 35: Effect of C-PC on telomerase activity (TRAP-ELISA Method)

FIG 36: Proposed mechanism of action of C-PC

**LIST OF TABLES**

Table 1: Comparison of cyclooxygenase enzymes

Table 2: Differences between apoptosis and necrosis

Table 3: Purification profile of C-PC from *Spirulina platensis*
