List of Tables

Table-3.1  Ranked list of primary sources (with percentage) needed by research workers .................................................................32
Table-3.2: Ranked List of Secondary Sources (with percentage) needed by research workers .................................................................34
Table-3.3: Ranked list of Institutional sources (with percentage) needed by research workers .................................................................36
Table-3.4: Ranked list of personal sources (with percentage) needed by research workers .................................................................37
Table-3.5: Ranked List of Information Services needed by research workers ..................................................................................39
Table-3.6: Frequency of attending seminars, conferences etc. (percentage in brackets) .......................................................................41
Table-3.7: Reasons for preferring different services (percentage in brackets) ...........................................................................................42
Table-3.8  Time spent for seeking information from required sources..................................................................................................44
Table-3.9: Methods of Collecting of Indian Information sources ........................................................................................................46
Table-3.10: Method of collecting information ..................................................................................................................................47
Table-3.11: Problems experienced in departmental libraries (percentage in brackets) ........................................................................47
Table-3.12: Problems experienced by research workers in other libraries (percentage in brackets) ....................................................................48
Table-3.13: Problems experienced by research workers with other sources (percentage in brackets) ..........................................................49
Table-3.14: Problems experienced by research workers in other institutes (percentage in brackets) ..............................................................50
Table-3.15: Occasions of Researchers – Fish Farmers Meeting (Percentage in brackets ) ........................................................................51
Table-3.16: Information needed by research workers from fish farmers ..................................................................................................51
Table-3.17: Problems in getting required Information..............................................................................................................................53
Table 3.18: Reasons for non-acceptance of new technology

Table 3.19: Measures for overcoming Problems

Table 3.20: Training Needs of Fish Farmers

Table 3.21: Rotated Component Matrix

Table 3.22: Spearman’s rank correlation matrix

Table 4.1: Number of family members of fish farmers engage in fish farming

Table 4.2: Length (in years) of experience of fish farmers in fish farming

Table 4.3: Approximate annual income of fish farmer from fish farming (in rupees)

Table 4.4: Information Seeking Behavior of fish farmers

Table 4.5: Rotated Component Matrix

Table 4.6: Spearman's Correlations (rho)
List of Figure

Figure 1 Ellis's information seeking behavioural framework (Wilson 1999) ...............6
Figure 2 The work chart structure (Byström and Järvelin, 1995) ..............................7
Figure 3: Non-linear model of information seeking behaviour illustrating component behaviour.......................................................................................................................... 8
Figure 4: Existing Information Dissemination System ..............................................78
Figure 5: Proposed Information Dissemination System .........................................80
