ACKNOWLEDGEMENTS

It is with feelings of profound thankfulness and deep sense of gratitude that the author acknowledges the invaluable guidance and the constant encouragement rendered to her by Professor K.P. Kshirsagar, Reader, Department of Geography, University of Poona, during the course of the present work.

The author is extremely grateful to Prof. Sharad Gore, Department of Statistics for his guidance in Statistical analysis; to Shri V.N. Antarkar, Meteorologist, for fruitful discussions and for taking personal interest; to Prof. P.S. Damle of the Department of Physics, University of Poona, for arranging computing facilities at NCSDCT, TIFR, Bombay; to Shri Narendra Chothe, then an M.E. Student; Department of Applied Mechanics, College of Engineering, Pune, for providing computer programme.

Above all, sincere thanks are due to the Head, Department of Geography, University of Poona, for providing facilities for the work; to the Deputy Director General observatories, India, Meteorological Department Pune and the Librarian, for providing the Climatological data and other
facilities; to the Statistician, Department of Agriculture, Government of Maharashtra, Pune, for providing recent daily rainfall data.

It is a pleasant duty of the author to put on record grateful thanks to the Staff members of the Department of Geography, University of Poona, for their unreserved help at all stages; to Shri K.S. Bapat for neatly and promptly typing the thesis and to Shri Pangarkar and Shri Wadgaonkar for preparing the illustrations.

The Junior Research Fellowship awarded by U.G.C. is gratefully acknowledged.

The author is indebted to many and regret it is not possible to mention all the names here on account of space limitations. Author is thankful to all of them.

Poona
