ACKNOWLEDGEMENT

Here, I would like to acknowledge those persons whose assistance and contribution was determinant in the realization of this thesis, which otherwise would not have been possible. Various people have contributed to and influenced me during my research work which I cannot list them all and must ask the forgiveness of those I omit.

First and foremost, I bow my head in reverence to Dhan Shri Guru Granth Sahib Ji for providing me the positive strength and energy to work on this topic and enabling me to research far beyond my own restricted ambit of thought and action.

I feel honoured to express my profound regard and a deep sense of gratitude to my worthiest and most esteemed teacher and supervisor, Dr. Parminder Singh, Professor of Economics, Former Head and Dean Faculty, Punjab School of Economics, Guru Nanak Dev University, Amritsar who encouraged me to adopt this career as a research scholar. His tireless patience, immense encouragements, and superb guidance throughout the period of this study have been a great strength to me. He is more than a supervisor for me. Thanks Sir, for believing in me and standing by me over the years.

Special words indeed, the words at my disposal are not adequate enough either in form or spirit to record the depth of my gratitude to Dr. Paramjeet Kaur Nanda, Professor and Head, Punjab School of Economics, Guru Nanak Dev University, Amritsar for his perpetual inspiration, unstinting support and sound advice. I am also thankful to Dr. Nitin Arora, Asst. Professor in Economics, Punjab University, Chandigarh for providing me support in my research work. My special thanks are due to S. Mukhtiar Singh and S. Bakhtawar Singh, library staff, Punjab School of Economics, Guru Nanak Dev University, Amritsar who has helped me throughout my research work. My thanks are also due to other subject experts who contributed in the study and without whose cooperation this piece of research could not have come in the present form.
I feel deprived in vocabulary when want to thank my loving Grandfather Late S. Baghel Singh and father S. Davinder Singh Aulakh for the shower of their precious blessings, providing me a vision, encouragement, inspiration, financial and moral support. Without my father’s support I could never have been what I am today. I very much appreciate for unsolicited cooperation and cheery assistance from my beloved wife Dr. Kawaljeet Kaur, Assistant Professor in Economics, Khalsa College, Amritsar, who always stood by me in completing this academic endeavor well in time. I would also like to thank my uncle’s S. Baldev Singh, S Jatinder Singh, S Darshan Singh and my mother Kulwant Kaur who has been a moving spirit behind all my achievements and a constant source of encouragement for me. Words do not come up to mark to qualify the feeling in my heart for my loving brothers Manjinder Singh, Daljinder Singh, Gurdev Singh, Parwinder Singh, Arvinder Singh and Inderjeet Singh for helping me in every possible manner to complete this work. My special thanks to my three little nephews Sachman, Samar and Harhukam and niece Simrat, whose cute smile always relaxed me from my hectic schedule.

I am also very thankful to Mr. Gaurav Bhatia who provides me intellectual and moral support to get through the studies and research. I warmly appreciate my dear friends Mandeep Singh Malka, Amarinder Singh, Tarlok Singh, Charanjeet Singh and Guryodh Singh who supported me throughout my research work. Sincere thanks are also due for all my nears and dears for their moral support and encouragement.

Last but not the least, I would like to acknowledge my thanks to Harjit Singh of Computer Hut for giving the finishing touch in typing of this thesis.

Dated:                                                                                  (JASWINDE SINGH)
