ACKNOWLEDGEMENTS

First and above all, I praise GOD, the ALMIGHTY for giving me the strength, ability and courage to complete this Ph.D. thesis work successfully.

First and foremost, I would like to express my sincere gratitude to my advisor Dr. M. SIVAKUMAR, Assistant Professor, Department of Physics, Alagappa University for his valuable guidance, scholarly inputs, consistent encouragement throughout my Ph.D. and related research work. His patience, motivation, immense knowledge, expert advice, moral support and perseverance helped me in all the time of my research and writing up this thesis. I could not have imagined having a better advisor and mentor for my Ph.D. study, without his support it would not have been possible to complete this research work. This thesis represents not only my work at the keyboard; it is also a milestone in more than one decade of work at Alagappa University and more specifically within the Energy Materials Lab.

Besides my advisor, I would also like to express my truthful gratitude and thanks to Dr. R. SUBADEVI, Assistant Professor, Department of Physics, Alagappa University for sharing her pearls of wisdom with me during the course of this research work. She was an instrumental in providing me numerous tips, comments and encouragement for successful completion of this project.

I extend my heartfelt thanks to Dr. G. Ravi, Professor and Head, Department of Physics, Alagappa University for identifying my skills in research work and giving me a chance to prove my worth in this organization and to avail the FT-IR facilities. I also thank Prof. C. Sanjeeviraja, Prof. S. Rajendran, Retired Professor and Heads, Department of Physics for their kind permission and support to carry out this work during this period.
I would like to convey my gratitude to Dr. V. Suriyanarayanan, Senior Principal Scientist, CECRI who was involved in the validation survey for this research project. Without his passionate participation and necessary inputs, the validation survey could not have been successfully completed.

My genuine thanks also go to Dr. C. Menaka and Dr. A. J. Gopunath for supporting me in characterization techniques and providing suggestions to pursue my research work.

I owe my whole hearted thanks to Prof. T. Thenappan, Prof. T. Mahalingam, Retired Professors and present faculties Prof. K. Sankaranarayanan, Dr. N. Anandhan, Dr. M. Ramesh Prabhu, Dr. R. Yuvakkumar, Dr. S. Sudhahar Department of Physics, and Dr. R. Sivakumar, DDE, Alagappa University for providing valuable support during my research work.

I extend my gratitude for the financial support through the minor research project under Alagappa University Research Fund (AURF) and major research project of Department of Science and Technology (DST) under PURSE for the award of Project Fellow.

I express my gratitude and thanks to my Energy Materials Lab colleagues Mrs. R. Dhanalakshmi, Dr. R. Muruganantham, Dr. P. Prahasini, Mr. M. Ramachandran, Mrs. G. Radhika, Mrs. K. Krishnaveni, Mrs. C. Kalaiselvi, Mr. K. Diwakar, Mr. P. Rajkumar, Ms. V. Priyanka, Mr. P. Arjunan, Ms. V. Meenakshi, Mr. M. Kouthaman, Mr. K. Kannan and all other M.Phil Scholars, of Energy Materials Lab and scholars of Department of Physics for supporting me to complete this research work nicely.
My deep sense of appreciation and gratitude goes to all the **non-teaching staff** members who made their presence available during my research study.

Last but not the least, I would like to express my profound gratitude to my spouse **Mr. C. K. Sangeeth kumar**, **My Parents**, **My Parent-In-Laws** and **My Brothers** for providing me with unfailing support and continuous encouragement throughout my years of study and my life in general.

(R.MUTHUPRADEEP)
