CONTENTS

CHAPTER 1: GENERAL INTRODUCTION

1.1 Introduction
1.2 Historical development and review of literature
1.3 A brief sketch of special functions
1.4 Fractional integral operators
1.5 Logarithmic derivative of gamma function or digamma function
1.6 Functional Relations
1.7 Conclusion

CHAPTER 2: FUNCTIONAL RELATIONS OF HYPERGEOMETRIC FUNCTIONS AND LOGARITHMIC DERIVATIVE OF GAMMA FUNCTION BY USING RIEMANN-LIOUVILLE AND WEYL FRACTIONAL INTEGRAL OPERATORS

2.1 Introduction
2.2 Mathematical pre-requisites
2.3 Main results
2.4 Conclusion

CHAPTER 3: FUNCTIONAL RELATIONS OF I-FUNCTION AND DIGAMMA FUNCTIONS USING ERDÉLYI-KOBER FRACTIONAL INTEGRAL OPERATORS

3.1 Introduction
3.2 Mathematical pre-requisites
3.3 Main results
3.4 Conclusion

CHAPTER 4: FUNCTIONAL RELATION OF ALEPH FUNCTION USING SAIGO FRACTIONAL INTEGRAL OPERATOR

4.1 Introduction
4.2 Mathematical pre-requisites
4.3 Main results
4.4 Conclusion
