List of Tables

Table 3.1 Sampling locations for water quality analysis. ......................... 34
Table 3.2 Methods used in water quality analysis of parameters
in Periyar river. .................................................................................... 46
Table 3.3 Sampling locations for sediment quality analysis. ............... 47
Table 3.4 Methods used in sediment analysis of parameters
in Periyar river ................................................................................ 49
Table 4.1 Spatio-temporal variation of Conductivity in
Periyar River (mS/cm). ....................................................................... 67
Table 4.2 Spatio temporal variation of TDS in Periyar river............... 69
Table 4.3 Spatio temporal variation of Phosphorus in Periyar river ....... 87
Table 4.4 Spatio-temporal variation of Organic nitrogen
in Periyar river. ................................................................................ 89
Table 4.5 Spatio-temporal variation of Ammoniacal nitrogen
in Periyar river .................................................................................. 91
Table 4.6 Spatio-temporal variation of organic phosphorus
Table 4.7  Spatial – temporal variation of Chlorophyll in Periyar River........94

Table 4.8  Spatio-temporal variation of Cadmium
in Periyar river, µg/l................................................................. 97

Table 4.9  Spatio-temporal variation of FS in Periyar river ..................... 102

Table 4.10  Spatio-temporal variation of FC in Periyar river....................... 102

Table 4.11  List of parameters used in water quality index
and their standards ................................................................. 118

Table 4.12  Water Quality Index of Periyar river ................................. 119

Table 4.13  Correlation between water quality variables and
water quality index ............................................................... 122

Table 4.14  Regression analysis for WQI ............................................... 123

Table 4.15  ANOVA for WQI .............................................................. 123

Table 4.16  Coefficients of regression analysis ...................................... 124

Table 4.17  Results of multivariate Tests of surface water ..................... 126

Table 4.18  Results of Component Matrix in surface water
quality in Periyar River. .......................................................... 132

Table 4.19  Total Phosphorus (mg/l) in the sediment
of Periyar river........................................................................ 138

Table 4.20  Pesticide in Sediment of Periyar River (µg/g)....................... 150
Table 6.1  River geometry for model development................................. 155
Table 6.2  Meteorological data for model development......................... 156
Table 6.3  Correlation analysis between reach variable
             used in QUAL2K. ..................................................................... 157
Table 6.4  Regression result of water quality variables with
             dissolved oxygen ..................................................................... 159
Table 6.5  Coefficients of regression analysis between
             water quality variables and dissolved oxygen......................... 159
Table 6.6  Trend analysis data of pH and DO (1980-2006) .................... 162
Table 6.7  Model data of pH in Periyar river ....................................... 163
Table 6.8  Alkalinity and dissolved oxygen data from
             1980 to 2011 ........................................................................ 167
Table 6.9  Model data of alkalinity in Periyar river............................. 168
Table 6.10 Chemical oxygen demand and Dissolved oxygen data
            in Periyar river from 1980-2011 ........................................... 171
Table 6.11 Model data of COD for Periyar river................................. 173
Table 6.12 Data of flow rate and dissolved oxygen in
            Periyar river from 1980 to 2006. ......................................... 177
Table 6.13 Model data of flow rate in Periyar river............................. 178
Table 6.14 Low flow analysis of Periyar river from 1980 to 2006............ 182
Table 6.15 Percentage of effluent discharge that can be passed
Table 6.16  Water temperature and Dissolved oxygen data from 1980 to 2006 for Periyar river.

Table 6.17  Model data of water temperature in Periyar river.

Table 6.18  Model data of dissolved oxygen data in Periyar river.

Table 6.19  Re-aeration rate in the Periyar river.

Table 6.20  Annual mean variation of air temperature, water temperature, rainfall, discharge, and dissolved oxygen for the period 1980 to 2006.

Table 6.21  Trends observed for hydro-climatic variables in Periyar river.

Table 6.22  Proposed Hypothetical Scenarios.

Table 6.23  Results of Proposed Scenarios.

Table 6.24  Correlation analysis between hydro-climatic variables.

Table 6.25  Correlation analysis between water temperature and dissolved oxygen.

Table 6.26  River geometry of each reach considered for analysis.

Table 6.27  River geometry of each reach considered for analysis.

Table 6.28  Re-aeration rate for each reach with different temperature scenarios.
