ACKNOWLEDGEMENT

I am deeply indebted to my respected supervisor, Dr. A. K. Singh, Reader, Department of Chemistry, Harishchandra P. G. College, Varanasi for not only formulating the idea and supervision of the present work, but also for guiding and encouraging me at every step. I would also like to express my sincere thanks to Dr. R.P. Singh, Principal, Harishchandra P. G. College, Varanasi and also to Dr. D. Ghosh, Head of the Department of Chemistry of the College for allowing me to use the facilities of the college to complete the study. My acknowledgements are also due to other faculty members of the College whom I consulted for their valuable advice from time to time.
I would like to express my gratitude to Dr. Jagdish P. Singh and Dr. Abhimanyu Yadav, both Reader in Chemistry, S. G. R. P. G. College, Karra, Dobhi, Jaunpur for encouraging me to take up the study and rendering all possible help at various stages of the study. Their support during the period was of immense importance that made the study successful. I express my heartiest thanks to Bihar State Pollution Control Board for providing me its facilities to carry on some analytical work related to this study. My acknowledgements are due to the Board also for having provided me with some baseline information about the ecology of the river Ganga at Patna. All these made this study more meaningful. The co-operation and help extended to me by my colleagues of the Board at various stages of the study is sincerely acknowledged. The support extended by Sri S.N. Jayaswal, Astt. Scientific Officer of the Board needs special mention without which this thesis could not have taken the shape
that it did. Thanks are also due to Sri Manish Kumar for computerizing the manuscript.

No words of mine could express my sentiments for the affection and support given to me by my family members, especially my mother and wife Smt. Radhika Ram, who took a lot of pain in looking after all the domestic affairs while I was on my present work. Thanks are also due to my loving children Master Ashutosh and Ms. Aditi for extending their support during the period.

I would like to express my profound honour to the holy mother-Ganga by offering my prayers who inspired me to work on this study and without whose blessings it could not have been completed successfully.

I also extend my deep gratitude to ‘Guru Satta’ who has been kind enough to shower His Blessings in every moment of my life.

(Parashuram Ram)
