CHAPTER-V

SUMMARY, CONCLUSIONS AND RECOMMENDATIONS
CHAPTER-V

Summary

Physical educators are trying to determine the most useful and effective programs for the future and this effort have led to many suggestions for the ideal school program, such as:

1. More reasonable goal is to try convincing students to incorporate physical activities into their life styles programs that concentrate on activities which are appropriate for every age group.

2. The new games approach is another growing area in physical education physical activities in which cooperation and mass participation is emphasized more than competition or to achieve a personal advantage.

3. Co-education activities have become increasingly important in the physical education program. Mixing or the sexes in those activities that are not considered physical contact (rough) activities.

In recent years many physical educators have been debating the exact status of the field of physical education, whether it is a profession, a discipline, or either one. Where does physical education sit into the academic, scheme of things? Physical education has many dimensions; one of these is a body knowledge, which is required by a discipline, while other dimensions are the traits of a profession and professional concern.

There are some football referees from Gujarat also in Bhavnagar one of them is me. I have personally attended **GULAB CHAUHAN Ex. FIFA Referee Secretary - GSFA**

**Gujarat State Football Association**
A referee course conducted by the Bhavnagar District Football Association and the instructor of the course was Gulab Chauhan.

Theory class for the referees of the Bhavnagar district.
GULAB CHAUHAN Ex FIFA Referee and Gujarat State Football Association Secretary gives well wishes to the referees for the game.

Analysis of the Game and Instruction provided by him to the referees.
The study was delimited to the male and female school and college physical education teacher

For this study there was no age limit.

This study was done in Bhavnagar city only.

For this study Football game was selected for Questioner.

For these study 70 Physical Education teachers were selected.

**Conclusion**

Q-1 Are the officials updated with the new laws?
   Out of 70 teachers 68 teachers answered yes and 2 teachers answered no therefore it shows that 97.14 % teachers are update with new laws of officiating

Q-2 As a physical education teacher are you aware of the laws of the game of football?
   69 teachers answered yes and 2 teachers answered no therefore it shows that 98.57% are aware of the laws of the game of football.

Q-3 Are the officials skillful enough?
   66 teachers answered yes and 4 teachers answered no therefore its shows that 94.28% are skillful to officiate.

Q-4 Are the officials having leadership qualities?
   69 teachers answered yes and 1 teacher answered no so we can say that 98.57 % officials have leadership qualities.

Q-5 Are the officials having good control on the game?
   In this question 67 teachers answered yes and 3 teachers answered no therefore it shows that 95.71 % of officials have good control on the game.
Q-6 Are you satisfied by the officiating done at your place in the tournaments?
   For this question 61 teachers were satisfied by the officiating and 9 teachers were not satisfied therefore it shows 87.14% are satisfied and 12.85% are not satisfied.

Q-7 Number of officials deputed in the matches is sufficient?
   59 teachers said that the officials deputed in the match is sufficient and 11 teachers said that they are not sufficient so we can say 84.28% agree that there are sufficient officials deputed in the match and 15.71% do not agree.

Q-8 Are the officials overloaded?
   40 teachers says that they are overloaded and 30 teachers says no therefore we can say 57.14 % said yes they are overloaded and 42.85% says no that the officials are not overloaded.

Q-9 Are players satisfied by the officiating done by the officials in different tournaments?
   65 teachers said that the players are satisfied with the officials and 5 teachers said that they are not satisfied so 92.85% are satisfied 7.14 % are not satisfied.

Q-10 Officials are paid fully as per the norms established by you?
   37 teachers says yes and 33 teachers says no therefore it shows 52.85% have answered yes and 47.14% have answered no.

Q-11 Are the officials having coordination among themselves?
   64 answered yes and 6 teachers answered no therefore it shows 91.42 % said yes and 8.57% said no.

Q-12 Are they using the standard equipments?
   64 teachers answered yes 6 teachers answered no so we can say that 91.42% says yes and 8.57 says no.
Q-13 Security is provided to officials?

Answer of 32 teachers was yes and 38 teachers was no in this question therefore 45.71% agree with this and 52.28% does not agree about the security provided to the officials.

Q-14 Are the officials biased?

In this question it seems that 33 teachers said that the officials are biased and 37 teachers said that they are not biased it means that 47.14% said yes they and 52.85% said no.
