List of tables

Table 1 Diversity of quorum sensing circuits and quorum sensing regulated functions in various bacteria 8

Table 2 AHL acylases in various bacteria 19

Table 3 AHL lactonase in various bacteria 22

Table 4 Diversity of microbial biocontrol agents and mechanism involved in biocontrol 30

Table 5 Identification of six selected isolates based on 16S rDNA sequencing 44

Table 6 Root colonisation ability of Bacillus isolates on mung bean 64

Table 7 In planta biocontrol of spoilage of bean sprouts caused by PccBR1 using AHL degrading Bacillus isolates 65

Table 8 Bacterial strains and plasmids used for cloning and expression 73

Table 9 Bacterial strains and plasmids used for infection and CSLM 102

Table 10 Viable count of P. aeruginosa PAO1 and P. aeruginosa PAO1 (lasI- rhlI-) on mung bean sprouts and roots 110

Table 11 Mortality rates in different mung bean infection plant trials in P. aeruginosa PAO1 and P. aeruginosa PAO1 (lasI- rhlI-) treated sprouts 111

Table 12 Viable count of P. aeruginosa PAO1 and Lysinibacillus sp. Gs50 on mung bean sprouts and roots during the course of infection 118

Table 13 Mortality rate of sprouts treated with P. aeruginosa PAO1 alone and co-inoculated with P. aeruginosa PAO1 and Lysinibacillus sp. Gs50 119
