# TABLE OF CONTENTS

**CHAPTER ONE** .......................................................................................................... 1

**INTRODUCTION** ....................................................................................................... 1

1.1 General Background of the study .................................................................. 1

1.2 Statement of Research Problem .......................................................................... 9

1.3 Significance of the Research ............................................................................ 13

1.4 Research Objectives ......................................................................................... 14

1.5 Research Hypothesis ........................................................................................ 15

1.6 Philosophical backing of the study ................................................................... 15

1.7 Theoretical Framework .................................................................................... 16

  1.7.1 Adoption or Diffusion Model .................................................................... 17

  1.7.2 Social Development Theory ...................................................................... 22

1.8 Conceptual Framework .................................................................................... 24

1.9 Limitation and Delimitation of study ............................................................... 28

1.10 Operational definition of key words ............................................................... 29

1.11 Chapter Plan ................................................................................................... 30

**CHAPTER TWO** .................................................................................................... 32

**LITERATURE REVIEW** ....................................................................................... 32

2.1 Definition of Organic Agriculture .................................................................... 32

  2.1.1 Emergence of Organic Agriculture in Nepal ............................................. 35

  2.1.2 Status of Organic Agriculture in Nepal ..................................................... 36

  2.1.3 Initiatives of Organic Agriculture .............................................................. 40

2.3 Impacts of Organic Agriculture ........................................................................ 43

  2.3.1 Negotiations ............................................................................................... 45

  2.3.2 Psychological Wellbeing ........................................................................... 45

  2.3.3 Gender dimension ...................................................................................... 46

  2.3.4 Labour Requirements ................................................................................. 46

2.4 Organic Agriculture and Development ............................................................ 47

2.5 Limitations to Empowerment through Organic Agriculture ............................ 48

2.6 Varied Sectors of Organic Products Demand.................................................. 49

  2.6.1 Global Demand of Organic Products .......................................................... 49

  2.6.2 Consumer Demand of Organic Products ................................................... 50

2.7 Possibilities of Organic Agriculture ................................................................. 53
FINDINGS AND DISCUSSIONS

4.1 Demographic information of respondents

4.1.1 District wise gender distribution of respondents

4.1.2 Age distribution of respondents

4.1.3 District wise level of education of respondents

4.1.4 Types of organic farming of respondents

4.2 Socio-economic changes of farmers after involvement in organic farming

4.2.1 Total organic agricultural land

4.2.2 Ownership of land use for organic farming

4.2.3 Annual income of farmers from organic farming

4.2.4 ANOVA of total income

4.2.5 District wise Multiple Comparisons of income

4.2.6 Regression analysis of demographic variables and Income

4.2.7 Motivational factors of doing organic agriculture

4.2.8 Knowledge of organic agriculture

4.2.9 Management of required cost in starting of organic farming

4.2.10 Satisfaction from the income of organic agriculture

4.2.11 Use of income of organic farming

4.2.12 More profitable organic farming

4.2.13 Organic agriculture bring positive changes in economic status of farmers

4.2.14 Organic agriculture created employment opportunity

4.2.15 Organic agriculture supported to make environment clean

4.2.16 Organic agriculture can support to reduce the size of abroad migration

4.2.17 Organic agriculture improve the quality of soil

4.2.18 Benefit is high in Organic agriculture than the traditional agriculture

4.2.19 Exhibition of Organic agriculture support in dissemination of organic products

4.3 Challenges and Opportunities of Organic farming

4.3.1 Challenges of Organic farming faced by farmers

4.3.2 Access of Certification of Organic farming

4.3.3 Use of types of pesticide in plant

4.3.4 Potential international market of organic product
4.3.5 Loss from the organic products ............................................................... 132
4.3.6 Possibility to get compensation if organic agriculture is destroyed or lost .......................................................................................................................... 133
4.3.7 Possibilities to extend the organic agriculture ......................................... 134
4.3.8 Training of organic agriculture ............................................................... 135
4.3.9 Exposure visit for the information of organic farming ............................ 136
4.3.10 Suggestion to new comers ................................................................. 138
4.3.11 People perception on challenges and opportunity of organic agriculture .......................................................................................................................... 139
4.4 Strategic model for sustainable organic farming in Nepal ......................... 144
  4.4.1 Support from the Nepal Government to organic agriculture ................ 144
  4.4.2 Necessity of continuation of organic agriculture .................................. 146
  4.4.3 Strategies for sustainability of Organic agriculture .............................. 147
  4.4.4 Need of organized market .................................................................... 148
  4.4.5 Necessity of Organic agriculture board .............................................. 149
  4.4.6 Easy loan facilities can support to sustain the organic agriculture ...... 150
  4.4.7 Necessity of cold store for organic products ...................................... 151
  4.4.8 Management of Auction market .......................................................... 151
  4.4.9 Necessity of training and research centre for organic agriculture ....... 152
  4.4.10 Information technology to inform about the price of goods .............. 153
  4.4.11 Need of trademark of organic products .......................................... 154
  4.4.12 Need of machines for processing and packing of goods ................. 155
  4.4.13 Analysis of Agriculture Policy of Nepal............................................ 156
  4.4.14 Sustainable model of organic agriculture ........................................ 158
  4.4.15 Reliability testing of proposed sustainable model of organic agriculture .......................................................... 168

CHAPTER FIVE ...................................................................................................... 173
SUMMARY, CONCLUSION AND RECOMMENDATION .................................. 173
  5.1 Summary of the study ............................................................................. 173
    5.1.1 Key findings of the study ................................................................. 175
  5.2 Conclusion of the study .......................................................................... 181
    5.2.1 Hypothesis testing ........................................................................... 186
    5.2.2 Theory testing ................................................................................ 187
